HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.

The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

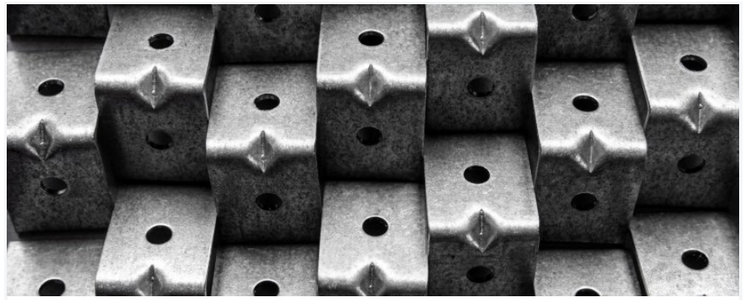
The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.



The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

OUR EXCLUSIVES

OUR EXCLUSIVES

Easy MOV

In a hospital environment where every gesture counts, it's essential to preserve the health and well-being of caregivers while ensuring patient safety. Stretcher carrying represents one of the highest-risk activities in terms of musculoskeletal disorders (MSDs), due to repeated efforts, awkward postures and often complex movements. Designed to meet these challenges, every detail has been thought out to make our medical devices, a daily ally in the prevention of MSDs, while improving the quality of working life for hospital staff.

Combating RSI

Optimum maneuverability for smooth, safe and effortless btowing,even on imperfect ground.His Wheels and his ergonomic Handles ensure optimized rollingand understanding..

OUR EXCLUSIVES

Easy CLEAN

In a hospital environment where hygiene is an absolute imperative, every minute spent cleaning counts. Nursing staff are faced with the need to ensure rigorous disinfection while maintaining a fast pace of work. The EasyClean® solution meets this challenge by facilitating cleaning. Hygiene protocols are respected without compromise, while lightening the staff's workload. The result: less effort, less wasted time, and enhanced safety for both patient and caregiver. EasyClean® is the guarantee of a cleaner, safer and more ergonomic environment, serving quality of care and comfort in the workplace..

EASY CLEAN®

Easy cleaning

Tool-free disassembly for rapid full cleaning, perfect hygiene and a real gain in comfort for nursing staff.Seatclips outfor easy cleaning.Frame inepoxy-coated steel..

OUR EXCLUSIVES

Easy Clip

In a care environment where every second counts and space is often limited, optimizing care is becoming a strategic issue to improve the efficiency of care teams and patient safety.The EasyClip® concept has been designed to meet these constraints with an approach that is both ergonomic, intuitive and modular..

Optimizing care during intake

The attachment of accessories is done in a single gesture, without any tools, offering immediate time saving. The accessories, entirely modulable, adapt to each need for a more fluid work and a transfer more efficient..

HIGHLIGHTS

HIGHLIGHTS

Two versions to suit all uses (Adaptability)

The KYELLE chair is available in two versions to adapt to the different needs of departments: a mobile version, designed to facilitate transfers and optimize circulation in care areas, and a resting version, favoring stability. This dual configuration enables facilities to choose the most relevant solution according to their practices and organization.

Comfort (Ergonomics)

The seat and backrest in high-resilience foam 35kg/m³ ensure optimum comfort thanks to their capacity to distribute pressure and quickly regain their shape. This density offers an ideal balance enabling the patient to benefit from stable support while avoiding points of discomfort. Durable and high-performance, this foam retains its qualities over time, offering a comfortable chair even under intensive use.

HIGHLIGHTS

Our choice of decors (Customization)

Because every detail counts in the care experience, the KYELLE chair, offers a wide choice of decors with M1 fire-resistant coverings, to suit your environment and reinforce your facility's visual identity. This customization goes beyond aesthetics: it helps create reassuring and coherent spaces, promoting comfort for patients and serenity for teams. A solution that combinesdesign, robustness and hygiene to meet the demands of hospital environments.

CHARACTERISTICS

CHARACTERISTICS

Mobility

Choosing wheels and brakes according to use

To adapt to the varied uses of facilities, the KYELLE chair offers several configurations of Wheels providing real comfortand safety on a daily basis. The centralized braking guarantees quick and intuitive immobilization, while the independent braking enables more precisecontrol in the event of frequent displacements. The 125 mm wheels ensure a smooth ride even with a patient seated.In the resting configuration, the4 glides and 2 glides equipped with integrated castors provide optimal stability while retaining sufficient mobility to easily reposition the chair.

Ergonomic pushbars

To effectively support nursing staff, the KYELLE chair incorporates anergonomic push bar, available in fixed or reversible versions. Designed to improve grip, it reduces the effort required when moving and makes stretchering more fluid. This ergonomic design helps limit physical strain on a daily basis, and plays an active part in the prevention of MSD(musculoskeletal disorders).

Armrests

Thanks to armrest adjustable, transfers become simpler, smoother and safer, whether sitting down or getting up. Intuitive unlocking with a simple pull of the index finger enables fast,effortless and completely autonomous handling. In the resting version, the fixed armrests offer a stable and reassuring support, ideal for lasting comfort. A modular solution that adapts to the patient's needs.

CHARACTERISTICS

Configurable

Footrest for easy transfer

The footrest has been designed to offer maximum comfort to the patient during transfer, effectively supporting the legs and facilitating movement. This feature enables more fluid iinstallation and exit, while reducing the effort of nursing staff and ensuring safe and ergonomic care. It optimizes both the comfortof the patient and the efficiencyof interventions, for a more practical and safe hospital environment.

Dedicated IV pole area

The chair is designed to accommodate IV poles on each side of the seat, offering immediate accessibility and maximum practicality. This intelligent layout enables caregivers to keep essential equipment within easy reach, optimize their organization and fluidify gestures during care. It contributes to time saving for greater efficiency and a more ergonomic and secure working environment for both staff and patients.

Meal tray holder

The meal tray stand has been designed to offer a convenient and comfortable solution for everyday use. Easy to install and remove, it enables the patient to eat meals directly in the chair, without constraint. His stability ensures secure support for eating, reading or other activities. At the same time, caregivers maintain fluid access to the patient, thanks to a system that doesn't interfere with picking up or moving around the chair.

Configurable comfort for enhanced support

Patient comfort adapts to every situation with a choice of two configurations. TheLegrest synchronized with the backrest offers fluid and coordinated movement for fast, harmonious positioning. Alternatively, the independent legrest tilting from 0 to 100° allows precise adjustment to suit morphology and desired comfort level. Assisted bygas cylinders, the adjustments are gentle, secure and easy to operate by nursing staff.

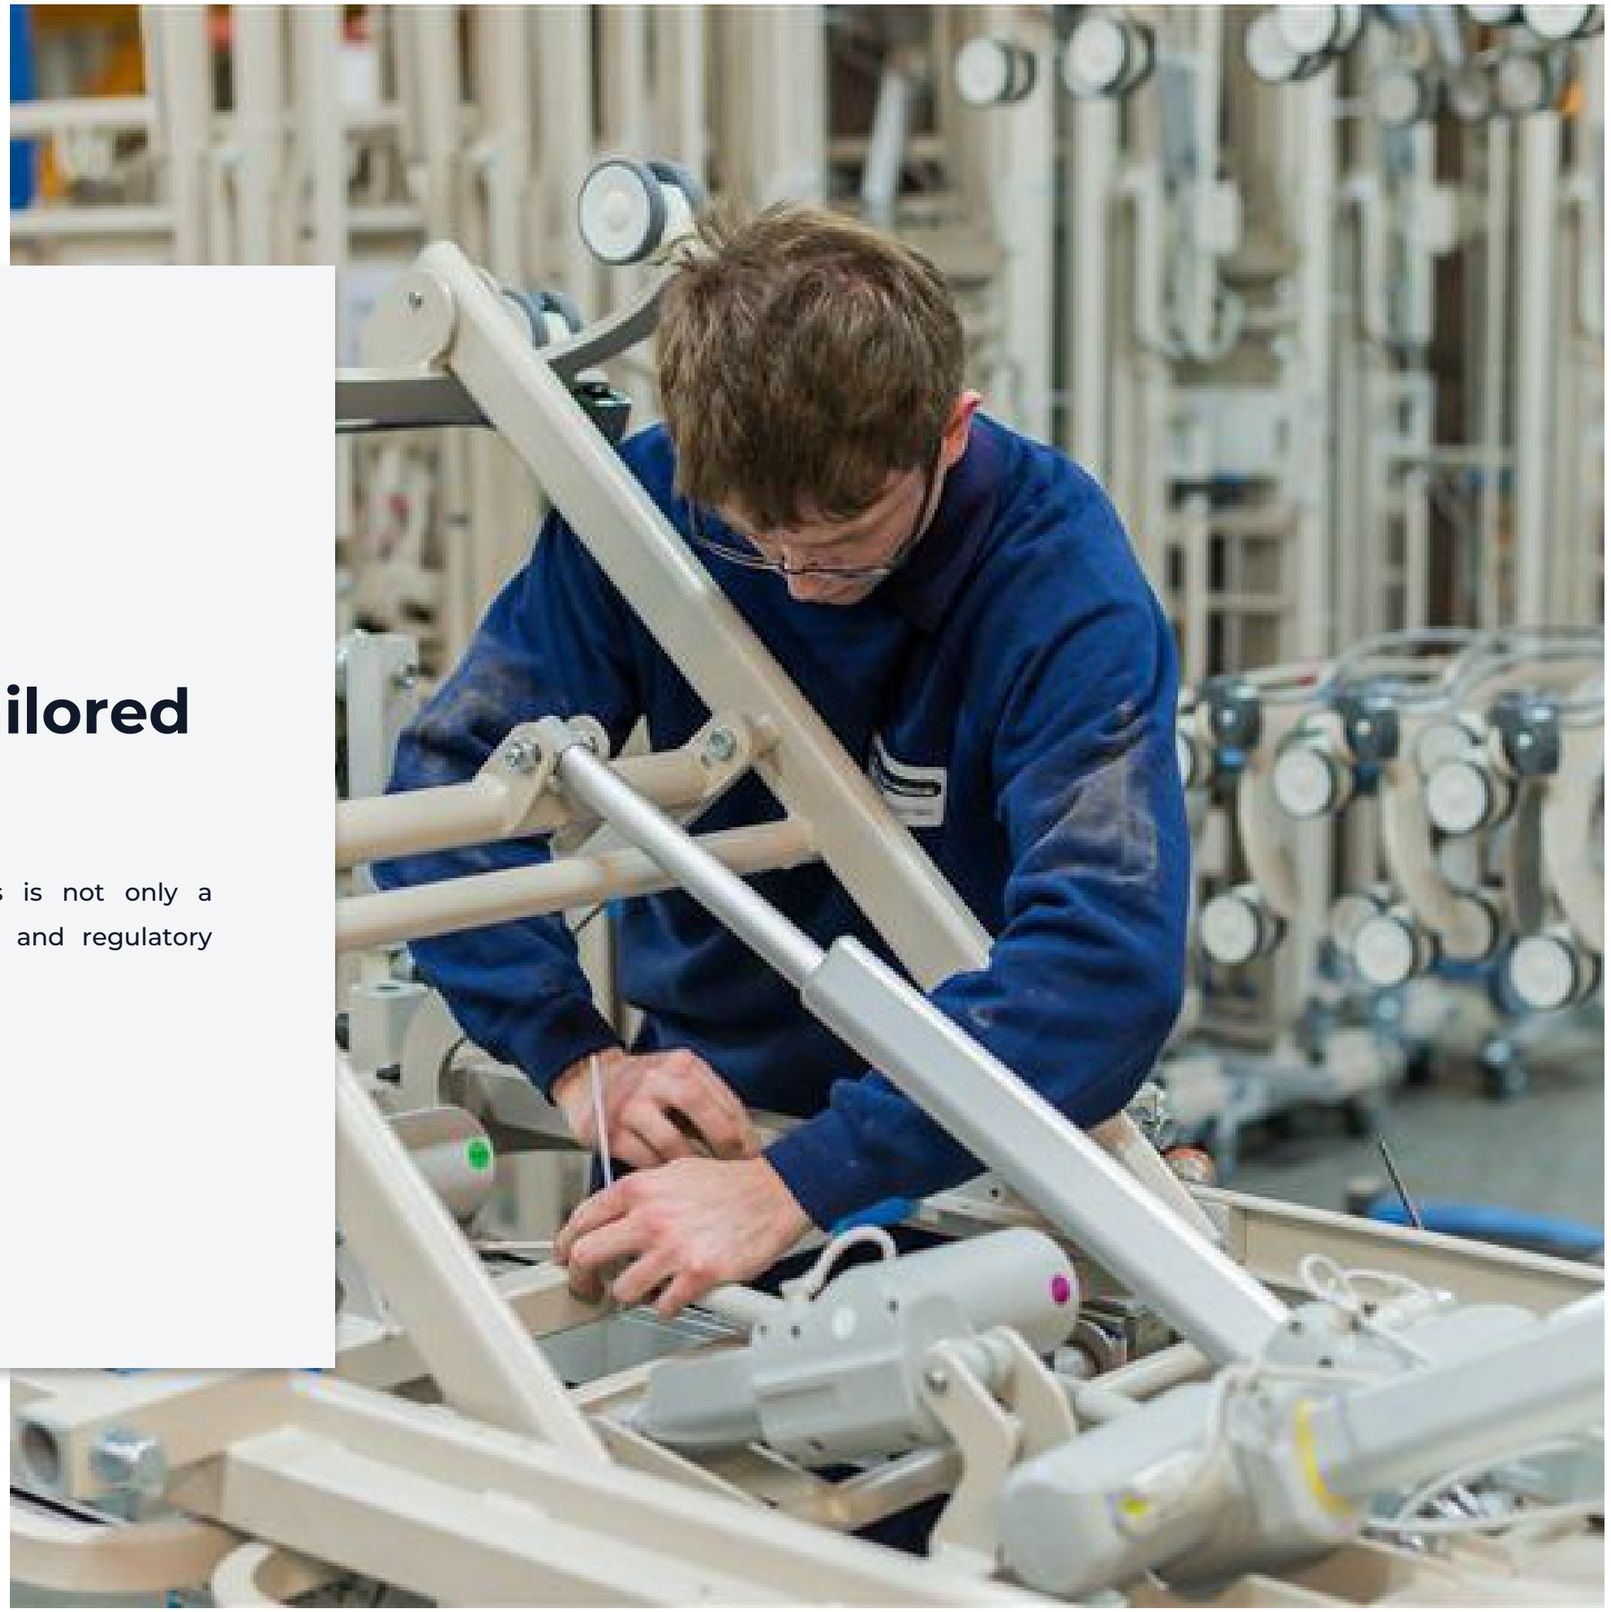
Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training



The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
