Our preventive maintenance services 21

HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.

The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

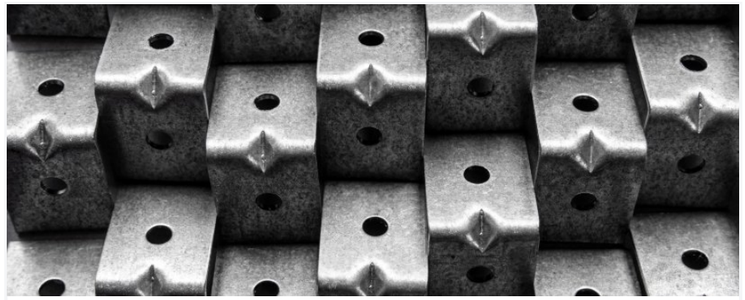
The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.



The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

SHOWER CARTS NURSING HOME

Bathroom / Hygiene

Variable Height - Proclive - CDX

HIGHLIGHTS

Easy cleaning (Easy CLEAN)

EASY CLEAN

Designed to simplify maintenance, the cart offers asmooth, easily accessible surface. TheSide Rails fold completely flat, allowing full cleaning without hard-to-reach areas.This designreduces time spent disinfectingand improves the efficiency of hygiene protocol. Thematerials resistantto cleaning products guarantee optimum durability. The whole makes caregivers' work easier, ensures impeccable hygiene and contributes to the safety of both patient and staff.

Combating RSI (Easy MOV)

EASY MOV'

The cart has been designed to optimize ease of stretchering and limit fatigue linked to repeated movements. its stable structure and intuitive grip reduce physical strain, while its rolling smoothness, thanks to its 150 mm rollers, reduces pushing and pulling efforts. This ergonomic design effectively contributes to the prevention of RSIand improves caregivers' working comfort.The cart thus accompanies teams on their daily journeys with greater lightness and safety.

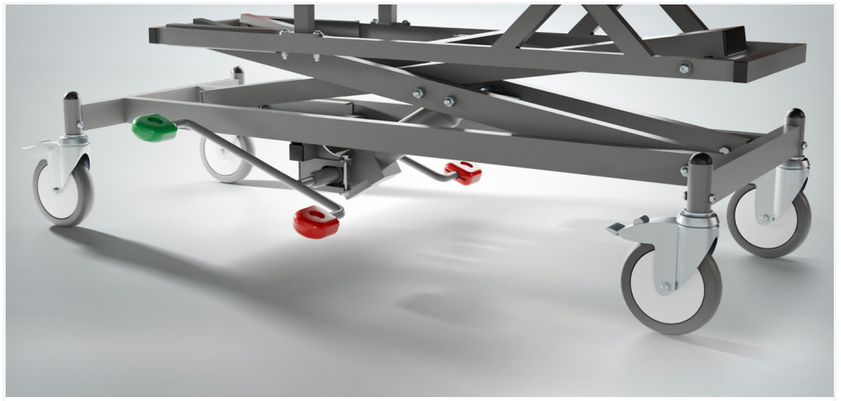
CHARACTERISTICS

CHARACTERISTICS

Mobility

Stretcher Handles

Designed to combine comfort of use and performance, the shower cart's stretcher handles offer maneuverabilityand a secure grip, making it easier to steer and control the cart. Their ergonomic shape and studied positioning reduce the effort required when moving. Thought to reduce musculoskeletal disorders (MSDs), these handles enable caregivers to work in better conditions, while ensuring the safety and stability of the patient during transfer.



Braking

Depending on departmental requirements, the cart can be equipped with individual braking or centralized braking. The individual brakingenables precise control per wheel, ideal for environments requiring precise adjustments. The centralized braking offers instant immobilization of the cart, reinforcing safety in care or transfers.This choice of configurations allows for adaptation to each facility and for the most ergonomic solution.

CHARACTERISTICS

Safety

Low position

Thanks to its hydraulic Low position, the cart offers a simple, safe and intuitive patient reception. The foot control allows the cart to be lowered, guaranteeing enhanced hygiene and fluid handling. By facilitating patient access from the very first step, this feature reduces effort and awkward postures, thereby limiting risks of RSI for caregivers.

High position

The Height position offers realwork comfort for caregivers by placing the care area at an optimal height. This configuration facilitates all nursing gestures and limits awkward postures, thus reducing the risk of RSI. By enabling intervention at an adjusted Height, it improves the accuracy and quality of cares while preserving the health of staff.For the patient, this ergonomics provides greater security and stability, making each intervention smoother and more comfortable..

Securing transfers

The retractable Side Rails provide clear access for simple, safe transfers. The fleece tarpaulin acts as a transfer aid: it makes it easy to transfer the patient from the cart to the bed or an examination table, while improving patient comfort. Its sealed design, combined with a articulation bellows, guarantees fluid handling.This set optimizes ergonomics, reduces caregiver effort and reinforces safety during each transfer.

CHARACTERISTICS

Features

Water drainage

Placed at the cart's feet, thedrain plug ensures fluid, controlled water flow management. its flexible drain hose makes it easy to reach any drain point, even in constrained spaces.This design optimizes emptying, limits splashing and improves hygienic conditions. Easy to access and simple to handle, it reduces preparation time, lightens the burden on caregivers and guarantees a clean, safe care environment.

Trendelenburg

The Trendelenburg function offers a controlled tilt of the cart, specially designed to facilitate the rapid and complete evacuation of water. By improving drainage, this position limits areas of stagnation, enhances lying surface hygiene. For caregivers, it simplifies end-of-care gestures, reduces handling and contributes to an ergonomic environment.

Technical specifications

MO-2011-00001

SHOWER TROLLEY

PACK - EQUIPMENT

Head & Foot boards	Push handle
Side Rails	Retractable siderails
Equipment	Drain outlet at the feet - Removable head cushion

WEIGHT - ECO-PERFORMANCE

Weight with side rails and push handles	86 kg

DIMENSIONS

Length structure + H&F Boards + siderails	213 cm
Width structure + H&F Boards + siderails	77 cm
Length sleeping surface	200 cm
Width sleeping surface	64,5 cm
Variable height minimum	50 cm
Variable height maximum	100 cm

MATERIAL & COATING

Material Cover	PVC coated fabric
Base Structure	Anti-corrosion treatment: POLYZINC - Black Epoxy Steel
Frame	Anti-corrosion treatment: POLYZINC - Black Epoxy Steel
Handles	Anti-corrosion treatment: POLYZINC - Black Epoxy Steel
Variable height	Anti-corrosion treatment: POLYZINC - Black Epoxy Steel
Wheels	Housing made of pressed steel, bright zinc plated - Thermoplastic rubber, grey non-marking
Protection base	4 rotating bumper system

TYPE

Variable height type	X-Type
Type of engine	Hydraulic
Type of brake	Individual brake on 4 castors

BASE

Type of footing	Castors
Wheels diameter	150 mm

INCLINATIONS

Reverse Trendelenburg	2 ° (standard inclination of the bed base) - 2 to 7 ° (Tredelenburg option)°

SAFETY CHARGE

Maximum patient weight	150 kg
SWL	170 kg

REGULATION

Medical device class	Class I
CE marking	CE

FIRE CLASSIFICATION

Mattress cover	M1

HIGHLIGHTS

- Easy CLEAN
- Easy MOV

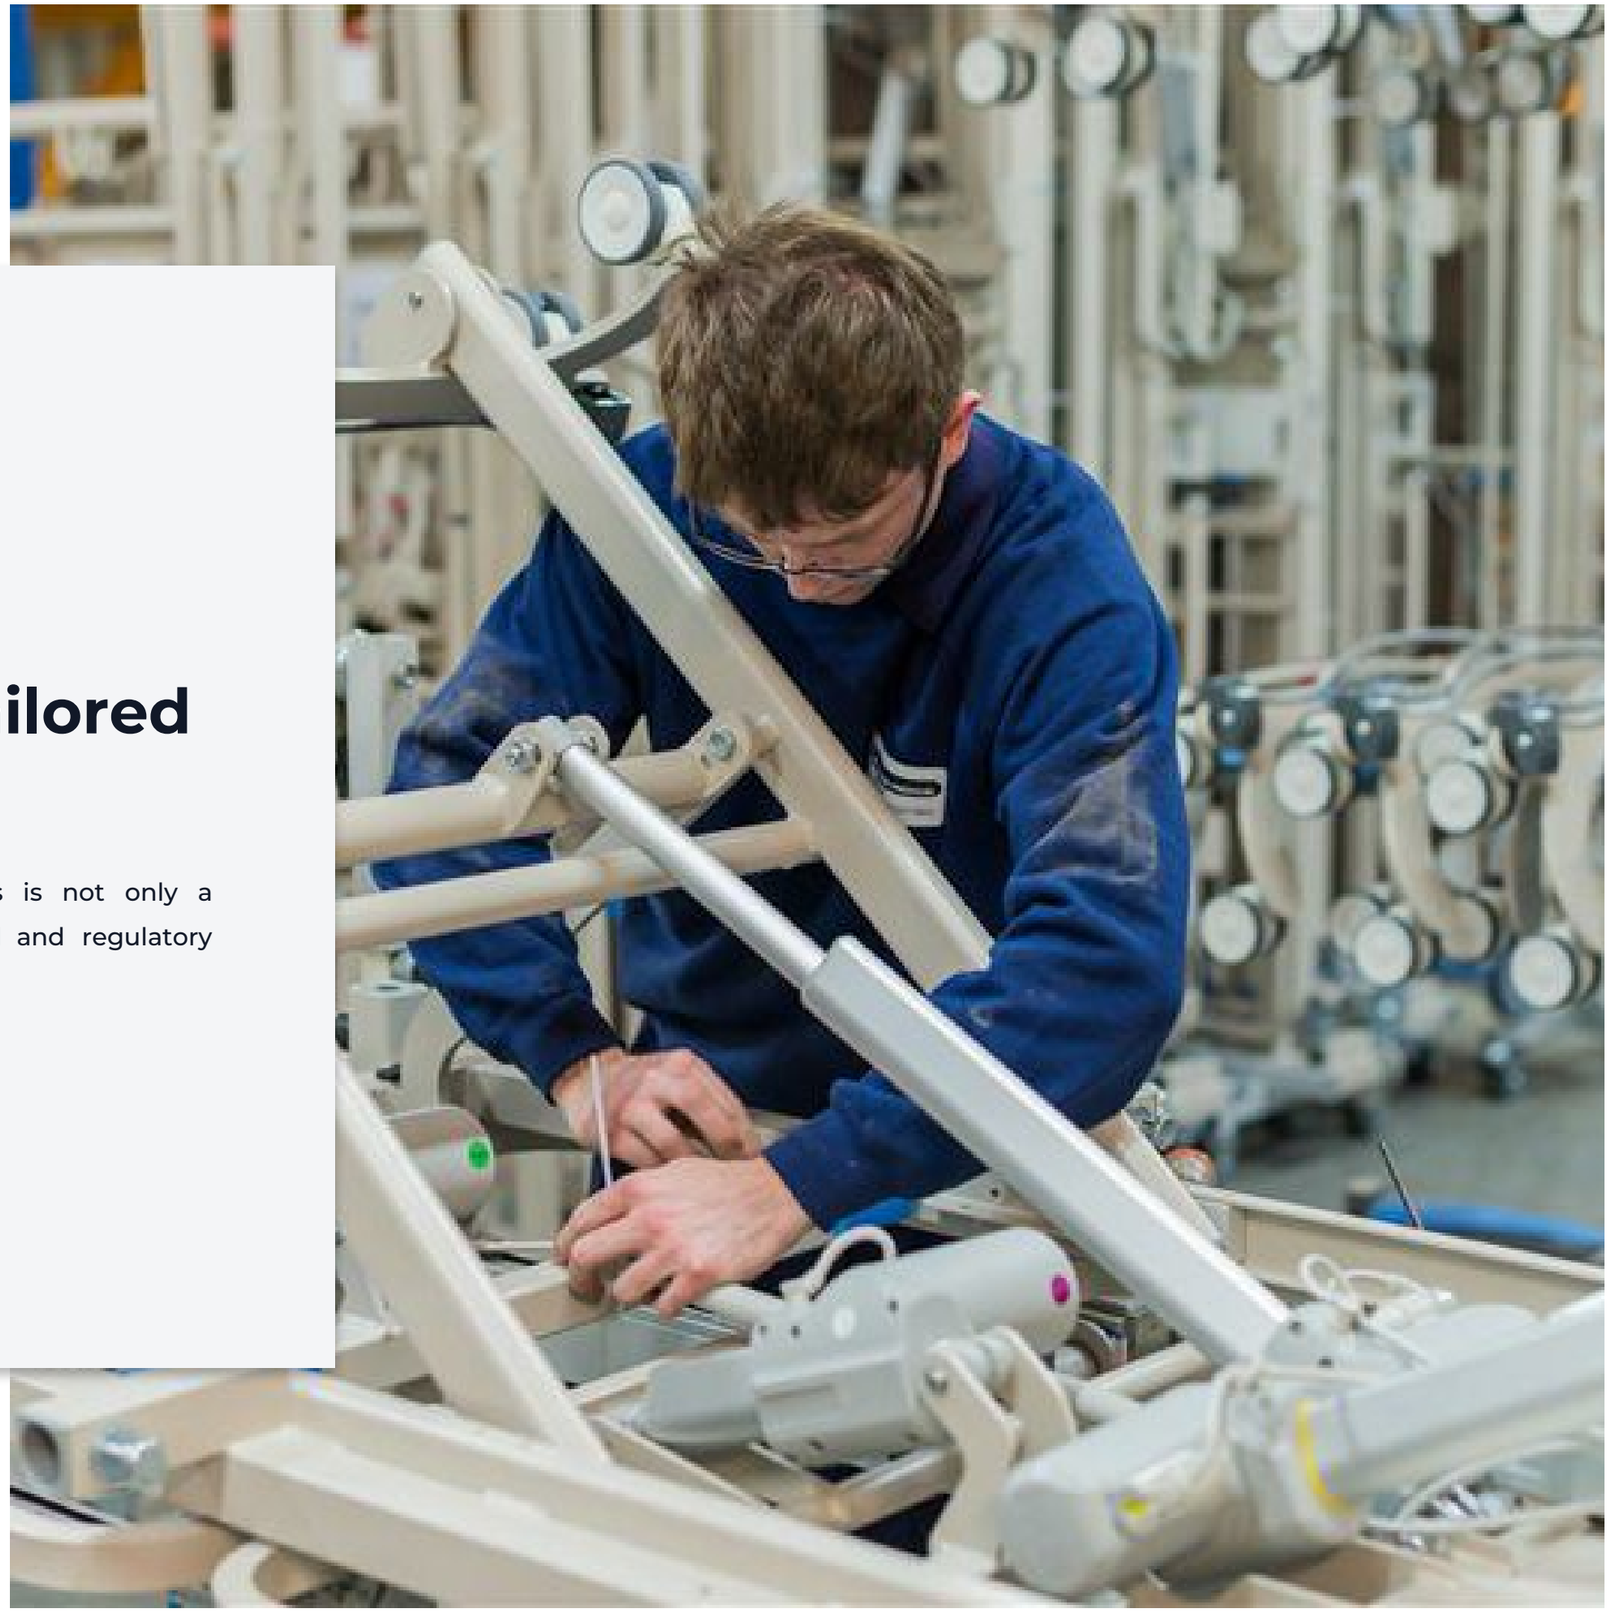
Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training



The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
