HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.

The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

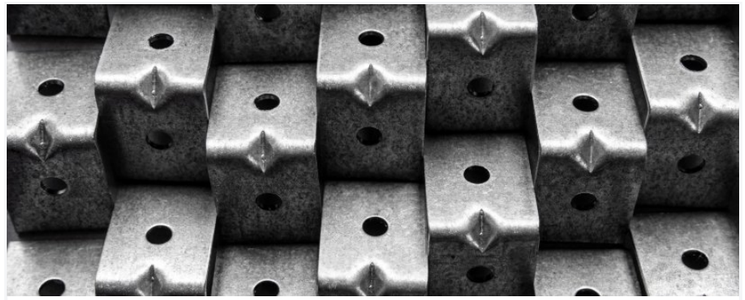
The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.



The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

ACCOMPANYING BEDS NURSING HOME

Medical Rehabilitation Care (MRC)

Folding Recliner - Fixed Armrests - AFR (CLEM)

HIGHLIGHTS

HIGHLIGHTS

Easy cleaning (Easy CLEAN)

EASY CLEAN

The CLEM recliner incorporates the EasyClean® solution, designed to meet hygiene requirements in hospital environments.His retractable pads allowfull access to surfaces, facilitating quick, efficient cleaning. The one-piece saddlery limits retention zones and reduces contamination risks, guaranteeing impeccable hygiene. This design simplifies maintenancefor teams and ensures precious time saving.

HIGHLIGHTS

Our coating choices (Customization)

Because every detail counts in the care experience, the CLEM recliner offers a wide choice of finishes with fire-resistant M1 coatings, to suit your environment and reinforce your facility's visual identity.This customization goes beyond aesthetics: it helps to create reassuring and coherent spaces, promoting patient comfort and team serenity.A solution that combinesdesign, robustness and hygiene to meet the demands of hospital environments.

CHARACTERISTICS

CHARACTERISTICS

Comfort

Inclinations

The CLEM recliner offersthree positionsto meet the needs of companions. Aseated position ideal for moments of daily life, ultra comfortwhich slightly elevates the legs to reduce fatigue and promote relaxation, and a folded position to optimize space when not in use. This modularity guarantees personalized comfort and great practicality in the care environment.

Headrest

The CLEM recliner features a retractable headrest, designed to adapt to the needs of each user. It provides optimal supportfor the neck, favoring relaxation and comfortduring moments of rest. Its practical design allows it to be easily folded to free up space or facilitate cleaning, guaranteeing impeccable hygiene in the care environment.

Armrests

The CLEM chair's fixed polypropylene armrests are designed for the comfort of companions. Ergonomically designed and stable, they offer a pleasant support to rest beside the patient, promoting moments of relaxation. Designed to resist intensive use, they guarantee durabilitywithout compromise and simplify maintenance for teams. A practical and comfortable solution to improve the reception of relatives.

Materials

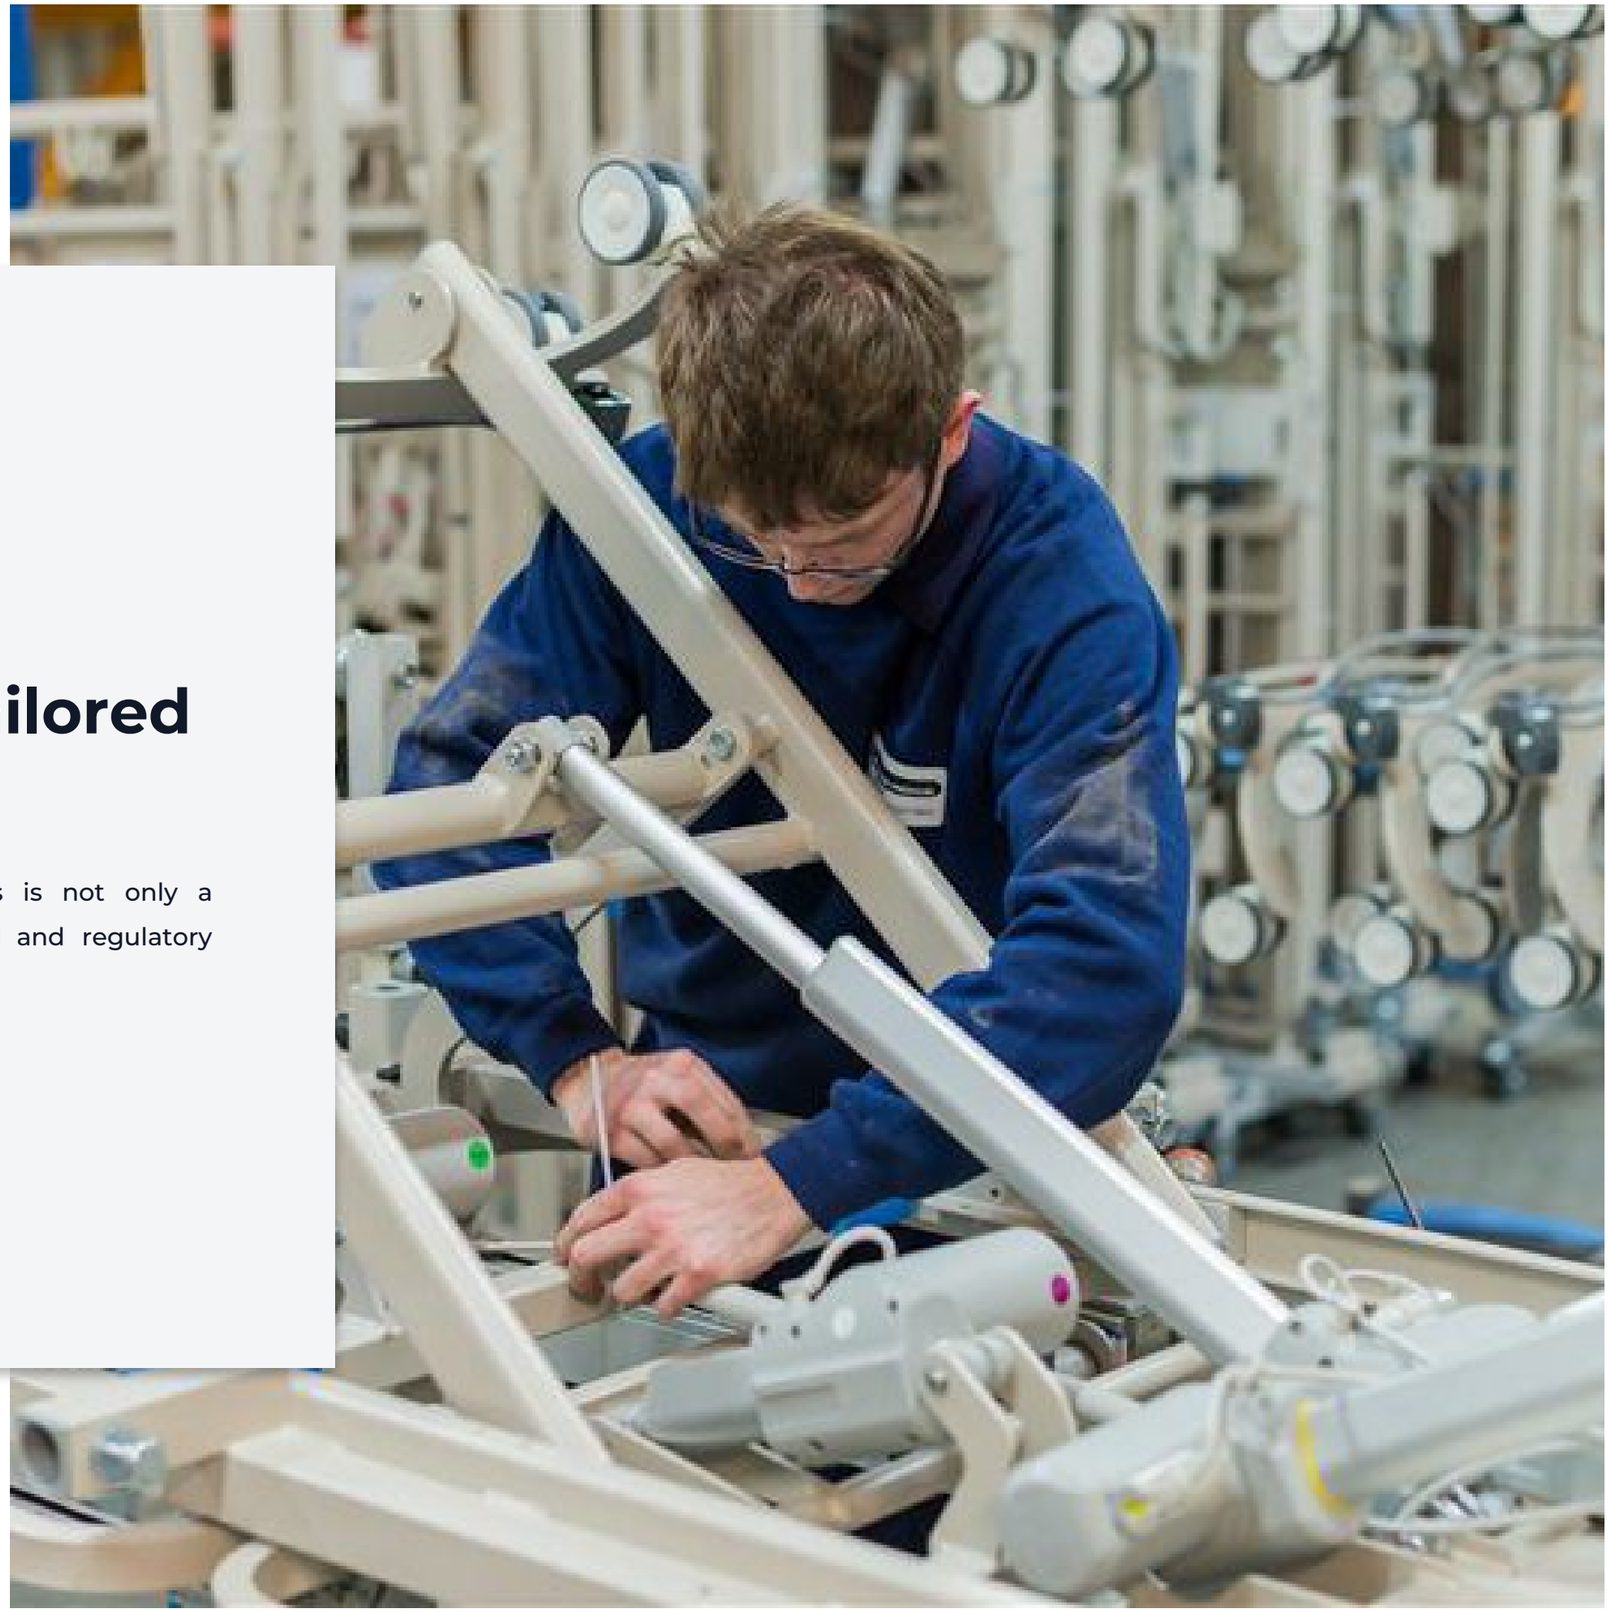
The CLEM recliner features High Resilience (HR) foam with a density of 28 kg/m³ and a thickness of 7 cm, offering superior comfort and excellent durability.This quality foamhugs the body's contours for even support, rreducing pressure points andpromoting natural posture.Its density guarantees excellent hold over time, even with intensive use.

Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training



The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
