HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.

The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

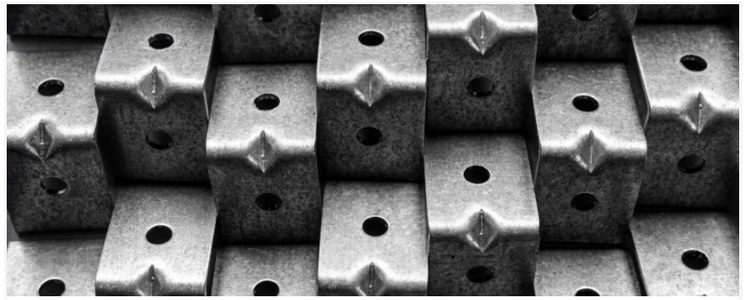
The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.



The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

ACCOMPANYING BEDS NURSING HOME

Medical Rehabilitation Care (MRC)

Convertible - Full armrests - Slatted bed base - AFC (ARETHA)

HIGHLIGHTS

HIGHLIGHTS

Easy cleaning (Easy CLEAN)

EASY CLEAN

The ARETHA bed chair is designed toreduce cleaning time and ensureimpeccable hygiene.All cushions are retractable, offering total access for maintenance and repairs.The 13-slat resin base limits dust retention and facilitates washing, ensuring a healthy environment in line with hospital requirements.

Our coating choices (Customization)

Because every detail counts in the care experience, the ARETHA companion bed chair offers a wide choice of finisheswith M1 fire-resistant coatings, to suit your environment and reinforce your facility's visual identity.This customization goes beyond aesthetics: it helps create reassuring, coherent spaces, promotingpatient comfort and team serenity.A solution that combines design, robustness and hygiene to meet the demands of hospital environments.

HIGHLIGHTS

Capacity for 1 or 2 persons (Dedicated configurations)

To meet every configuration, our range offers two models, thesingle-seater chair, ideal for small spaces and mobility, andthe double version, designed to promote conviviality. Whichever option you choose, you benefit from the same ergonomic features, the same comfort and the same quality. These solutions combinesturdiness, design and practicality, making it possible to create harmonious environments tailored to the requirements of healthcare facilities.

CHARACTERISTICS

CHARACTERISTICS

Comfort

Seat

The ARETHA bed chair incorporates a 35 kg/m³ high resilience (HR) foam seat.This density guarantees better hold over time, firm, comfortable support, and limits sagging even after prolonged use.Result: an ergonomic seat that reduces fatigue and improves the well-being of companions.

Mattresses

The ARETHA bed chair incorporates a genuine mattress in 35 kg/m³ high resilience foam, 10 cm thick, to offercomfort comparable to a classic bed. Its articulated design adapts to different positions, guaranteeing optimal support and quality rest for companions, even during extended stays.

Bed base

ARETHA incorporates a box spring composed of13 resin slats, each capable of supporting up to 100 kg. This design guarantees even supportfor prolonged use. The slats promote ventilation of the mattress, reducing moisture for enhanced hygiene.Comfort and safety are thus assured for companions even during long stays. >

CHARACTERISTICS

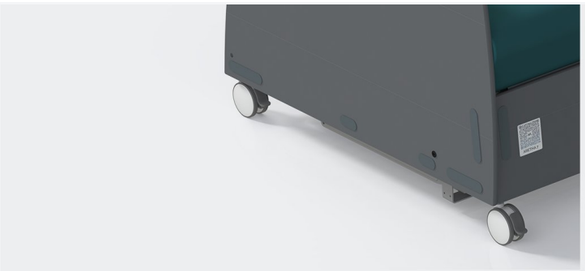
Ergonomics

Easy unfolding

The ARETHA bed chair is designed to simplify the day-to-day life of carers and hospital staff.Hisfront-opening mechanism allows the chair to be converted into a bed in a single, effortless movement fortime saving for comfort.His compact design optimizes space in the room and facilitates circulation, even in restricted environments.The epoxy-coated steel Frame ensures the durability necessary in the hospital environment.

Armrests

Aretha adapts to your needs with two armrest types. Saddlery armrests provide superior comfortr and a pleasant feel to the touch, ideal for creating a warm, welcoming atmosphere. Fullarmrestsoffer a clean design, great robustnessand ease of maintenance, perfect for environments where hygiene and durability are a priority. Whichever option you choose, you benefit from the same quality, ergonomics and reliability for furniture that combines comfort, practicality and elegance.



Footing

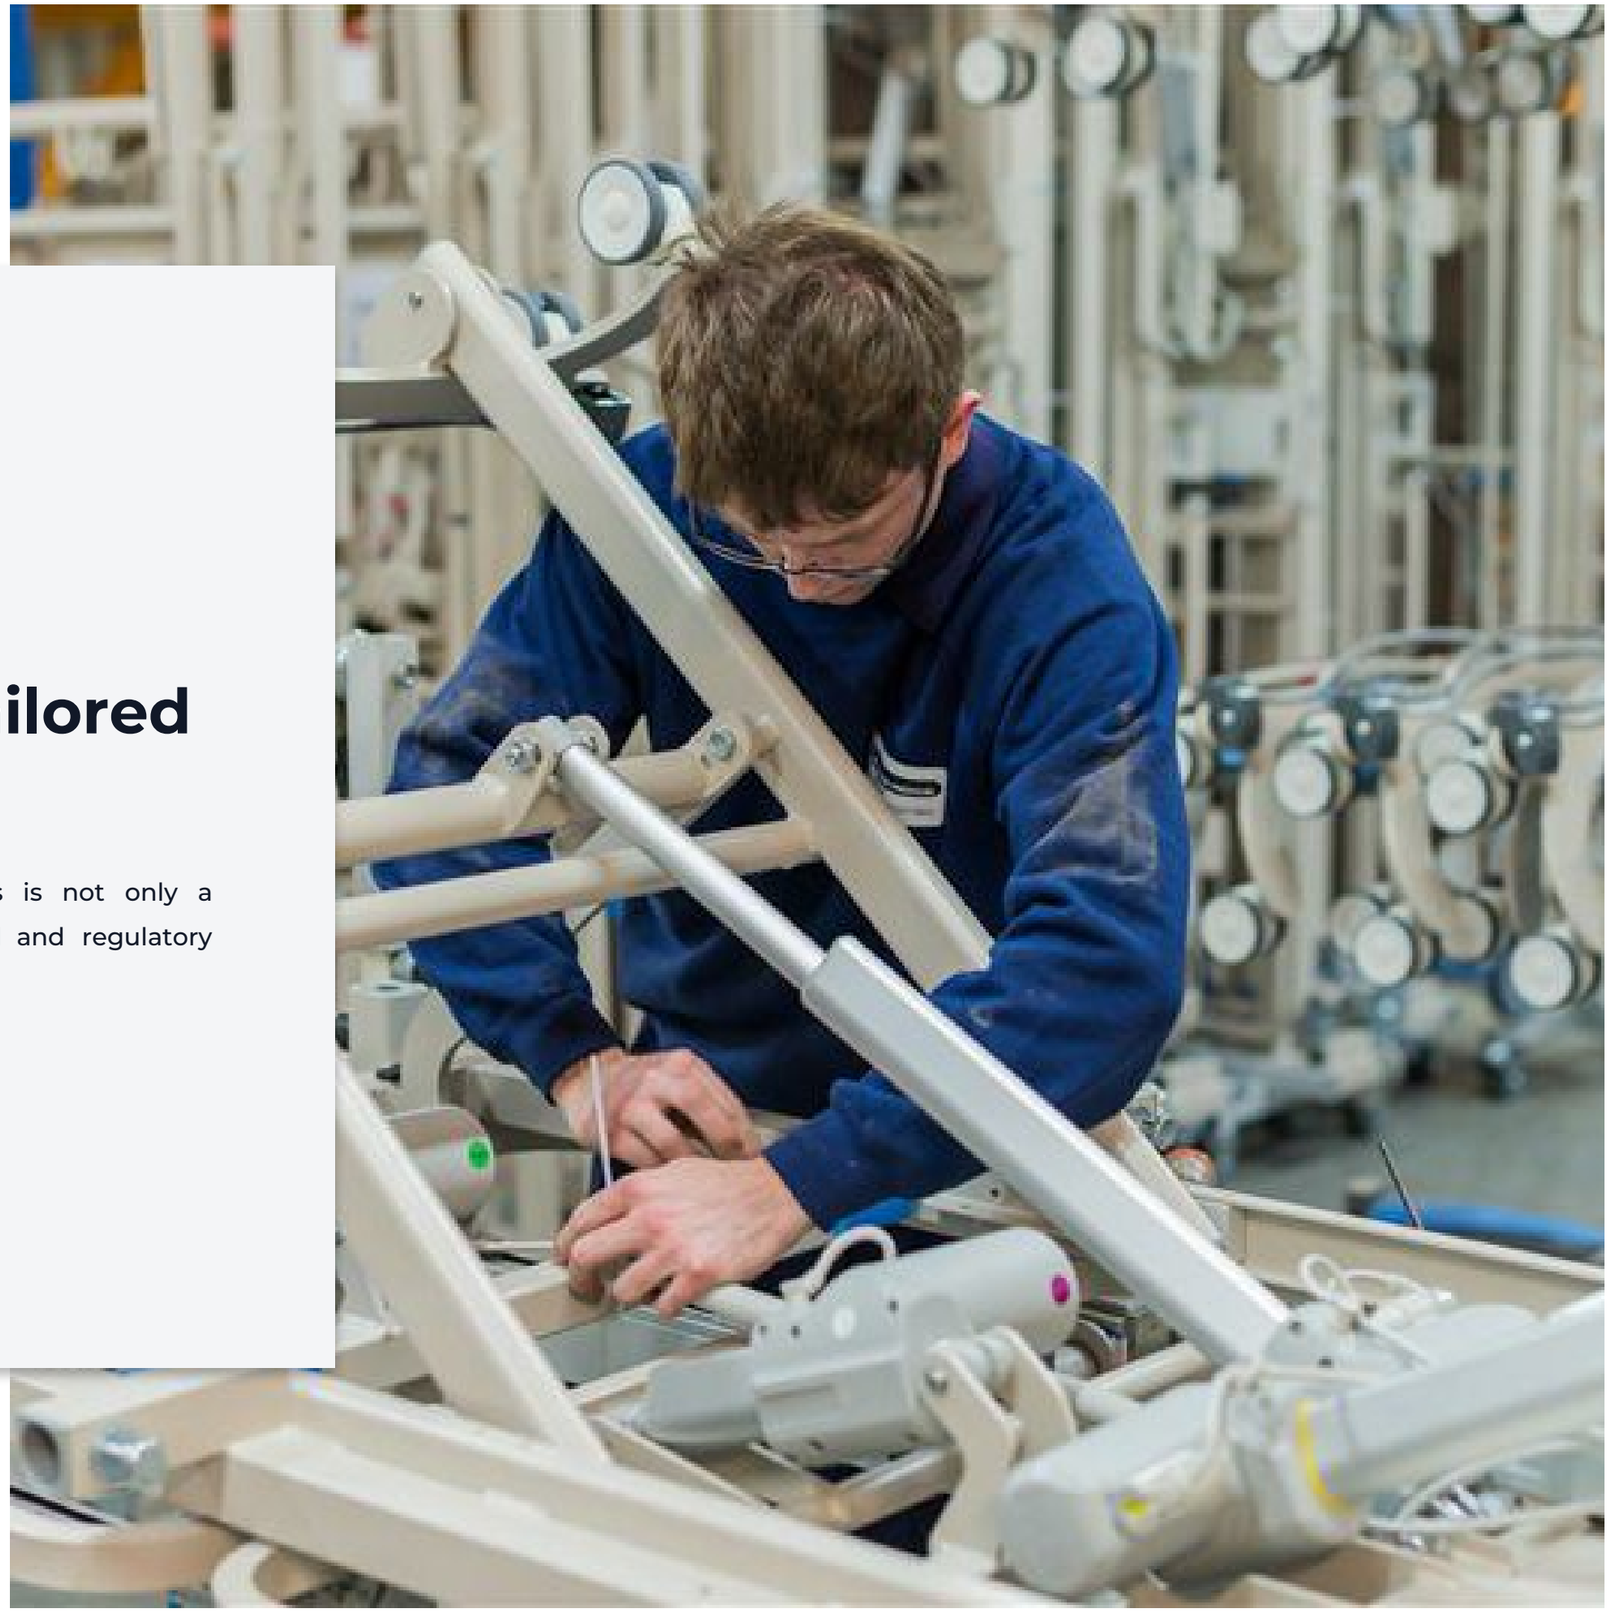
The ARETHA bed chair is equipped with 4 80 mm single-roller castors with independent brakes, enabling smooth, safe movement. The brakes ensure reliable immobilization, while the diameter of the castors facilitates maneuvering in narrow corridors and rooms, reducing staff effort and improving safety.

Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training



The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
