HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.

The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

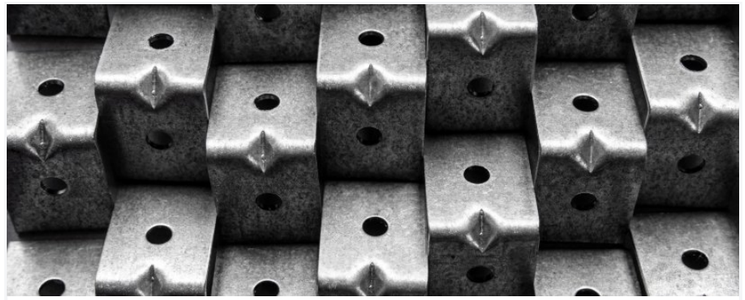

The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.

The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

Treatment preparation room

Closed cabinet with attached drawers - MM3 (MOD'ALLI)

OUR EXCLUSIVES

OUR EXCLUSIVES

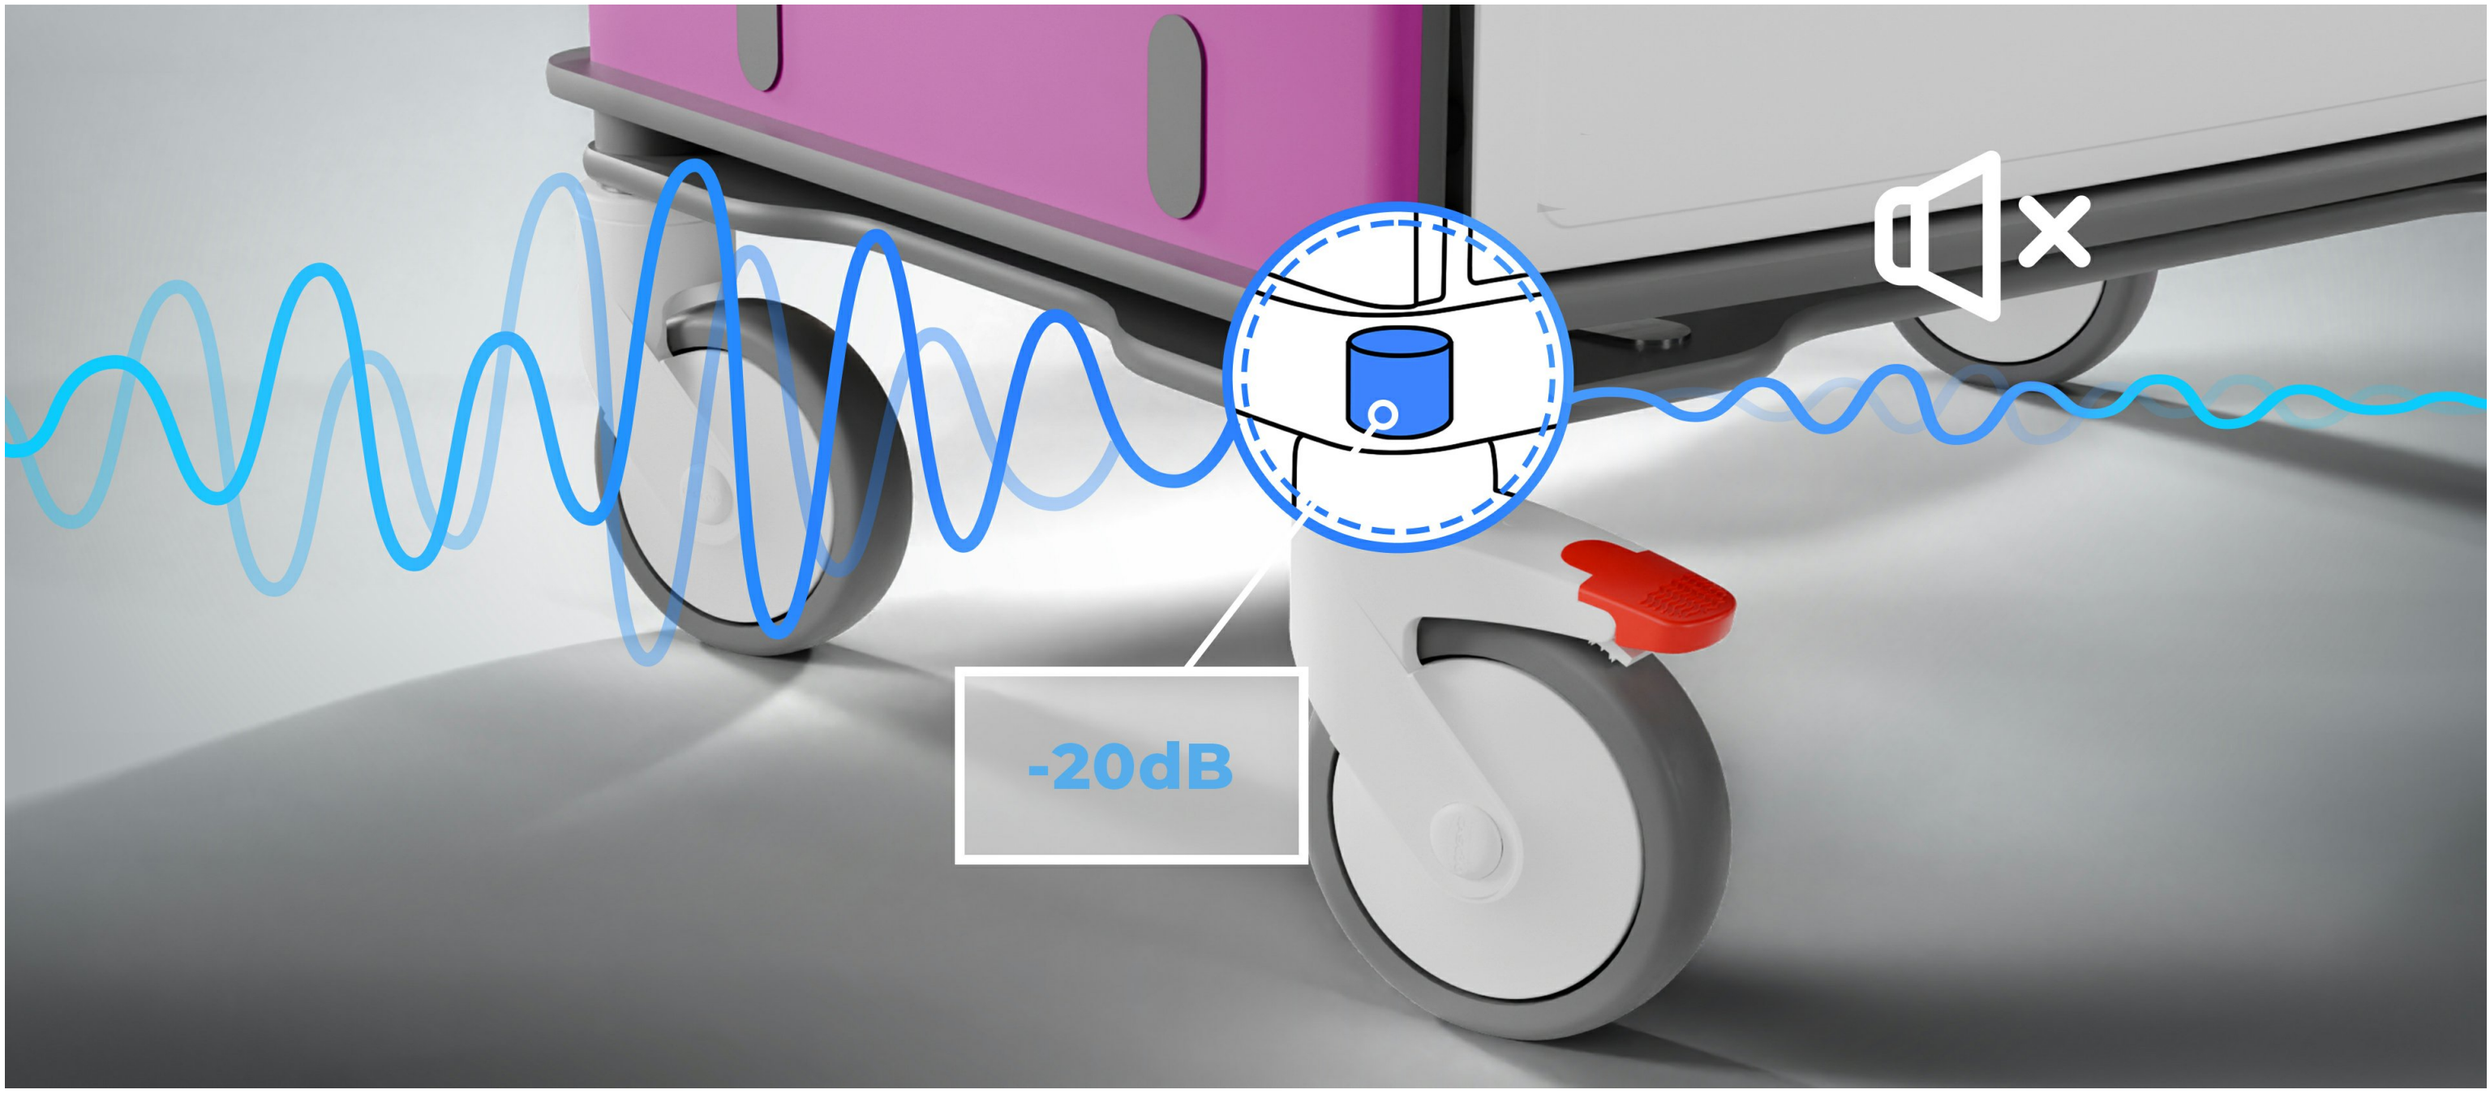

Soft Sound

Over the past 40 years, average noise levels in hospitals have risen by 15 decibels (dB), reaching levels of around 70 dB, well above the WHO recommended limit of 35 dB for a healthcare environment. HAcare products are designed to combat noise pollution. The aim is to reduce noise by 20dB with the addition of dampers on all rolling and stretcherable structures.

SOFT SOUND®

Fighting noise pollution

Support anti-vibration, high-performance shock absorber: for smooth, quiet and comfortable movements, even when crossing thresholds or exiting elevators. The noise pollution is significantly reduced..

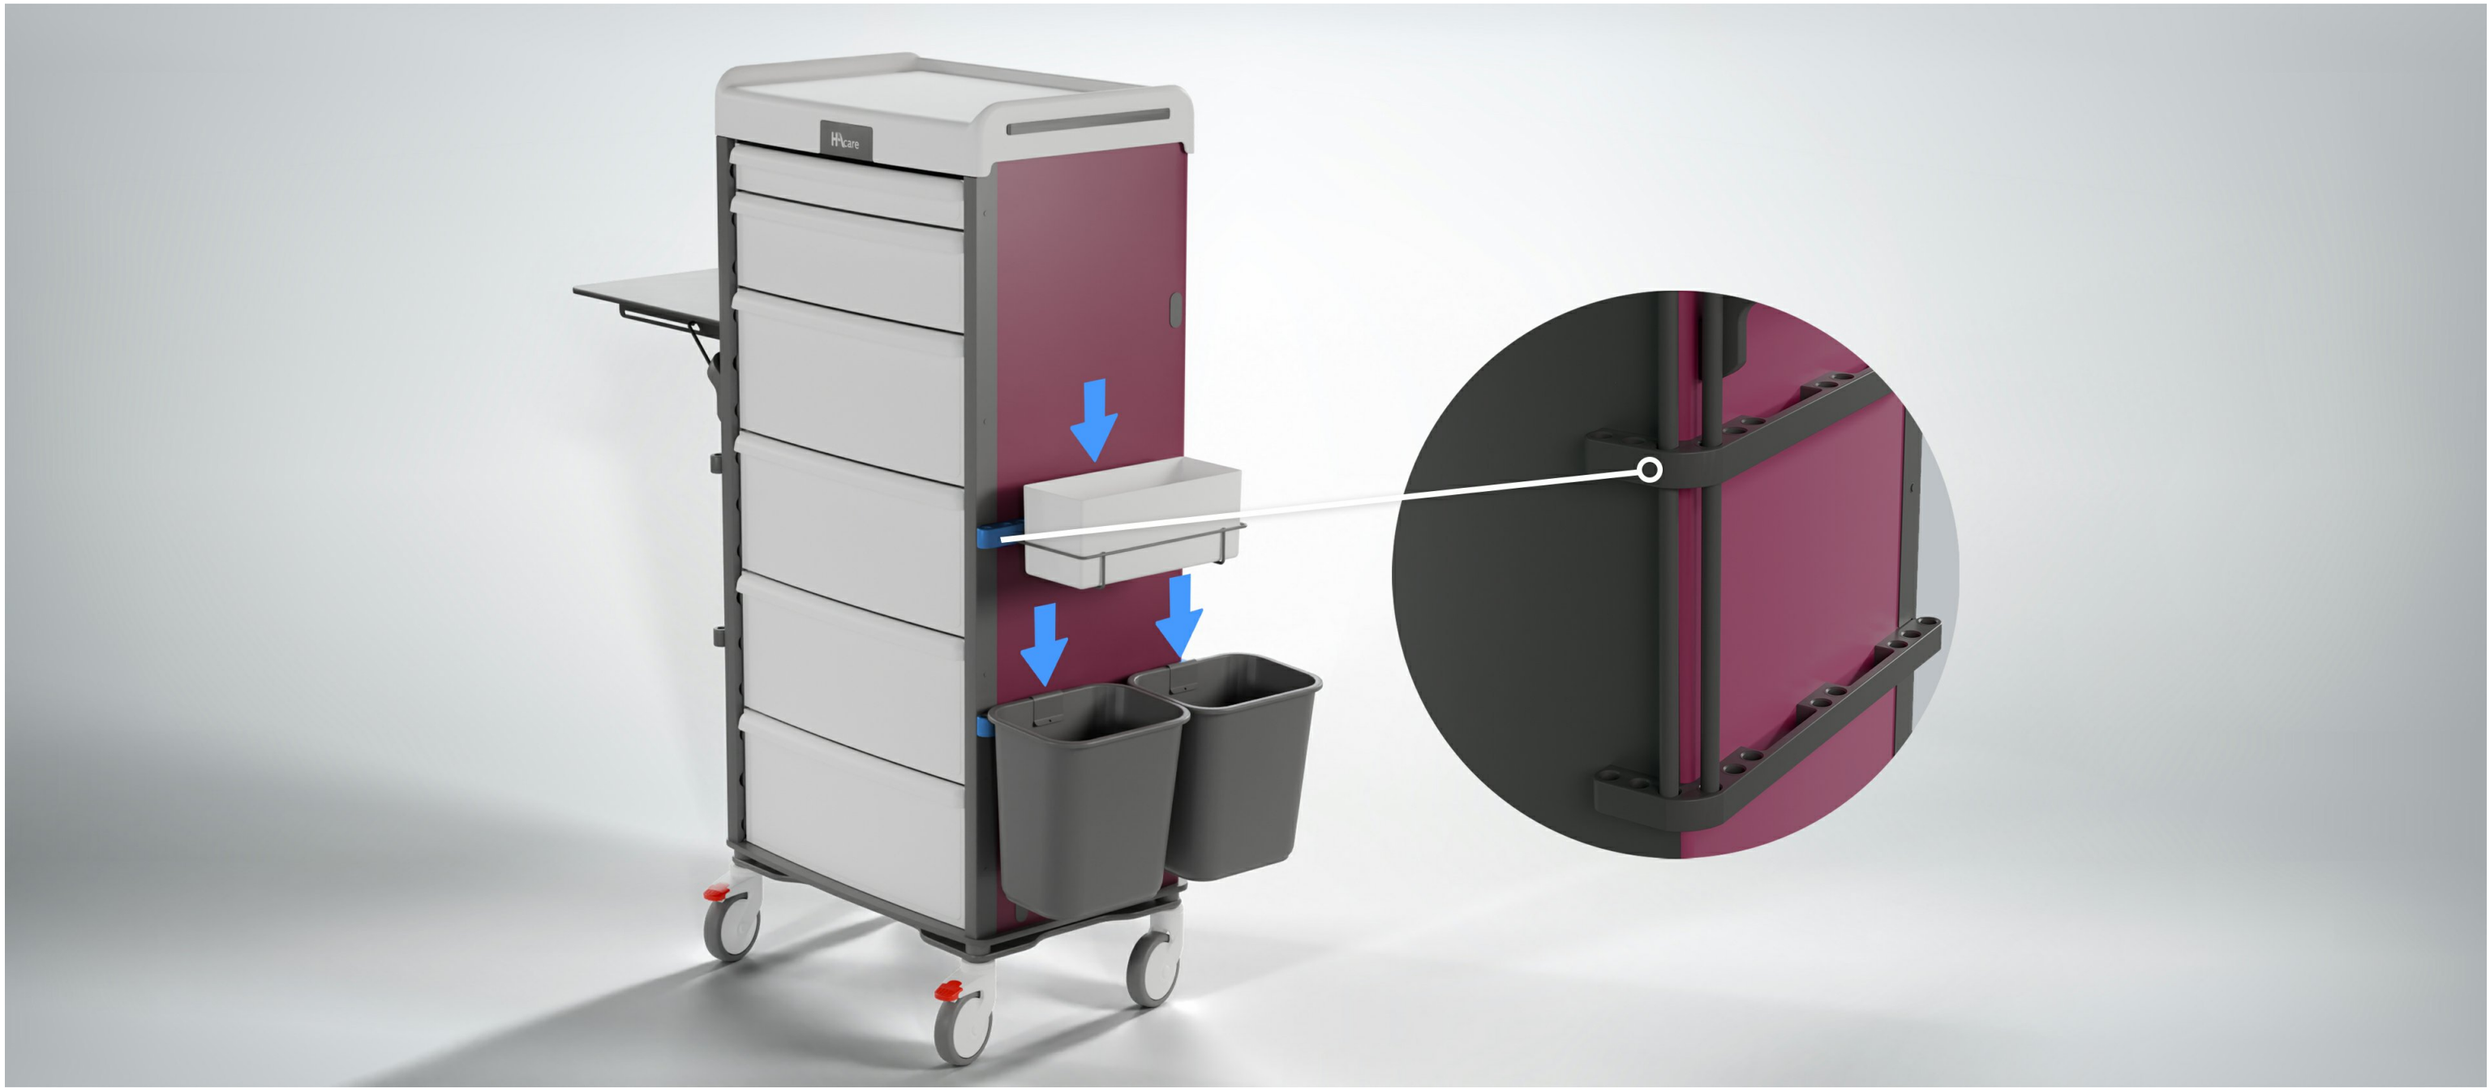

OUR EXCLUSIVES

Easy Clip

In a care environment where every second counts and space is often limited, optimizing the care surface is becoming a strategic issue to improve the efficiency of care teams and patient safety.The EasyClip® concept has been designed to meet these constraints with an approach that is both ergonomic, intuitive and modular..

Optimizing the treatment surface

The attachment of accessories is done in a single gesture, without any tools, offering immediate time saving. The accessories, entirely modular, adapt to every need and every care situation, for smoother and efficient work every day..

OUR EXCLUSIVES

No key concept

The locking of care carts is essential to guarantee the safety of healthcare products and the traceability of procedures. Whether keyed, electronic or sealed, it protects contents from unauthorized access and limits the risk of error or theft. Adapted to hospital requirements, this security system ensures rapid, controlled access to authorized caregivers, reinforcing compliance, confidentiality and serenity in care departments.

Secure storage

Locks electronic with digicode, RFID or by simple key for security adapted to each use. The RFID offers rapid and secure access, limiting access to authorized personnel. Traceability, reliability and everyday practicality.

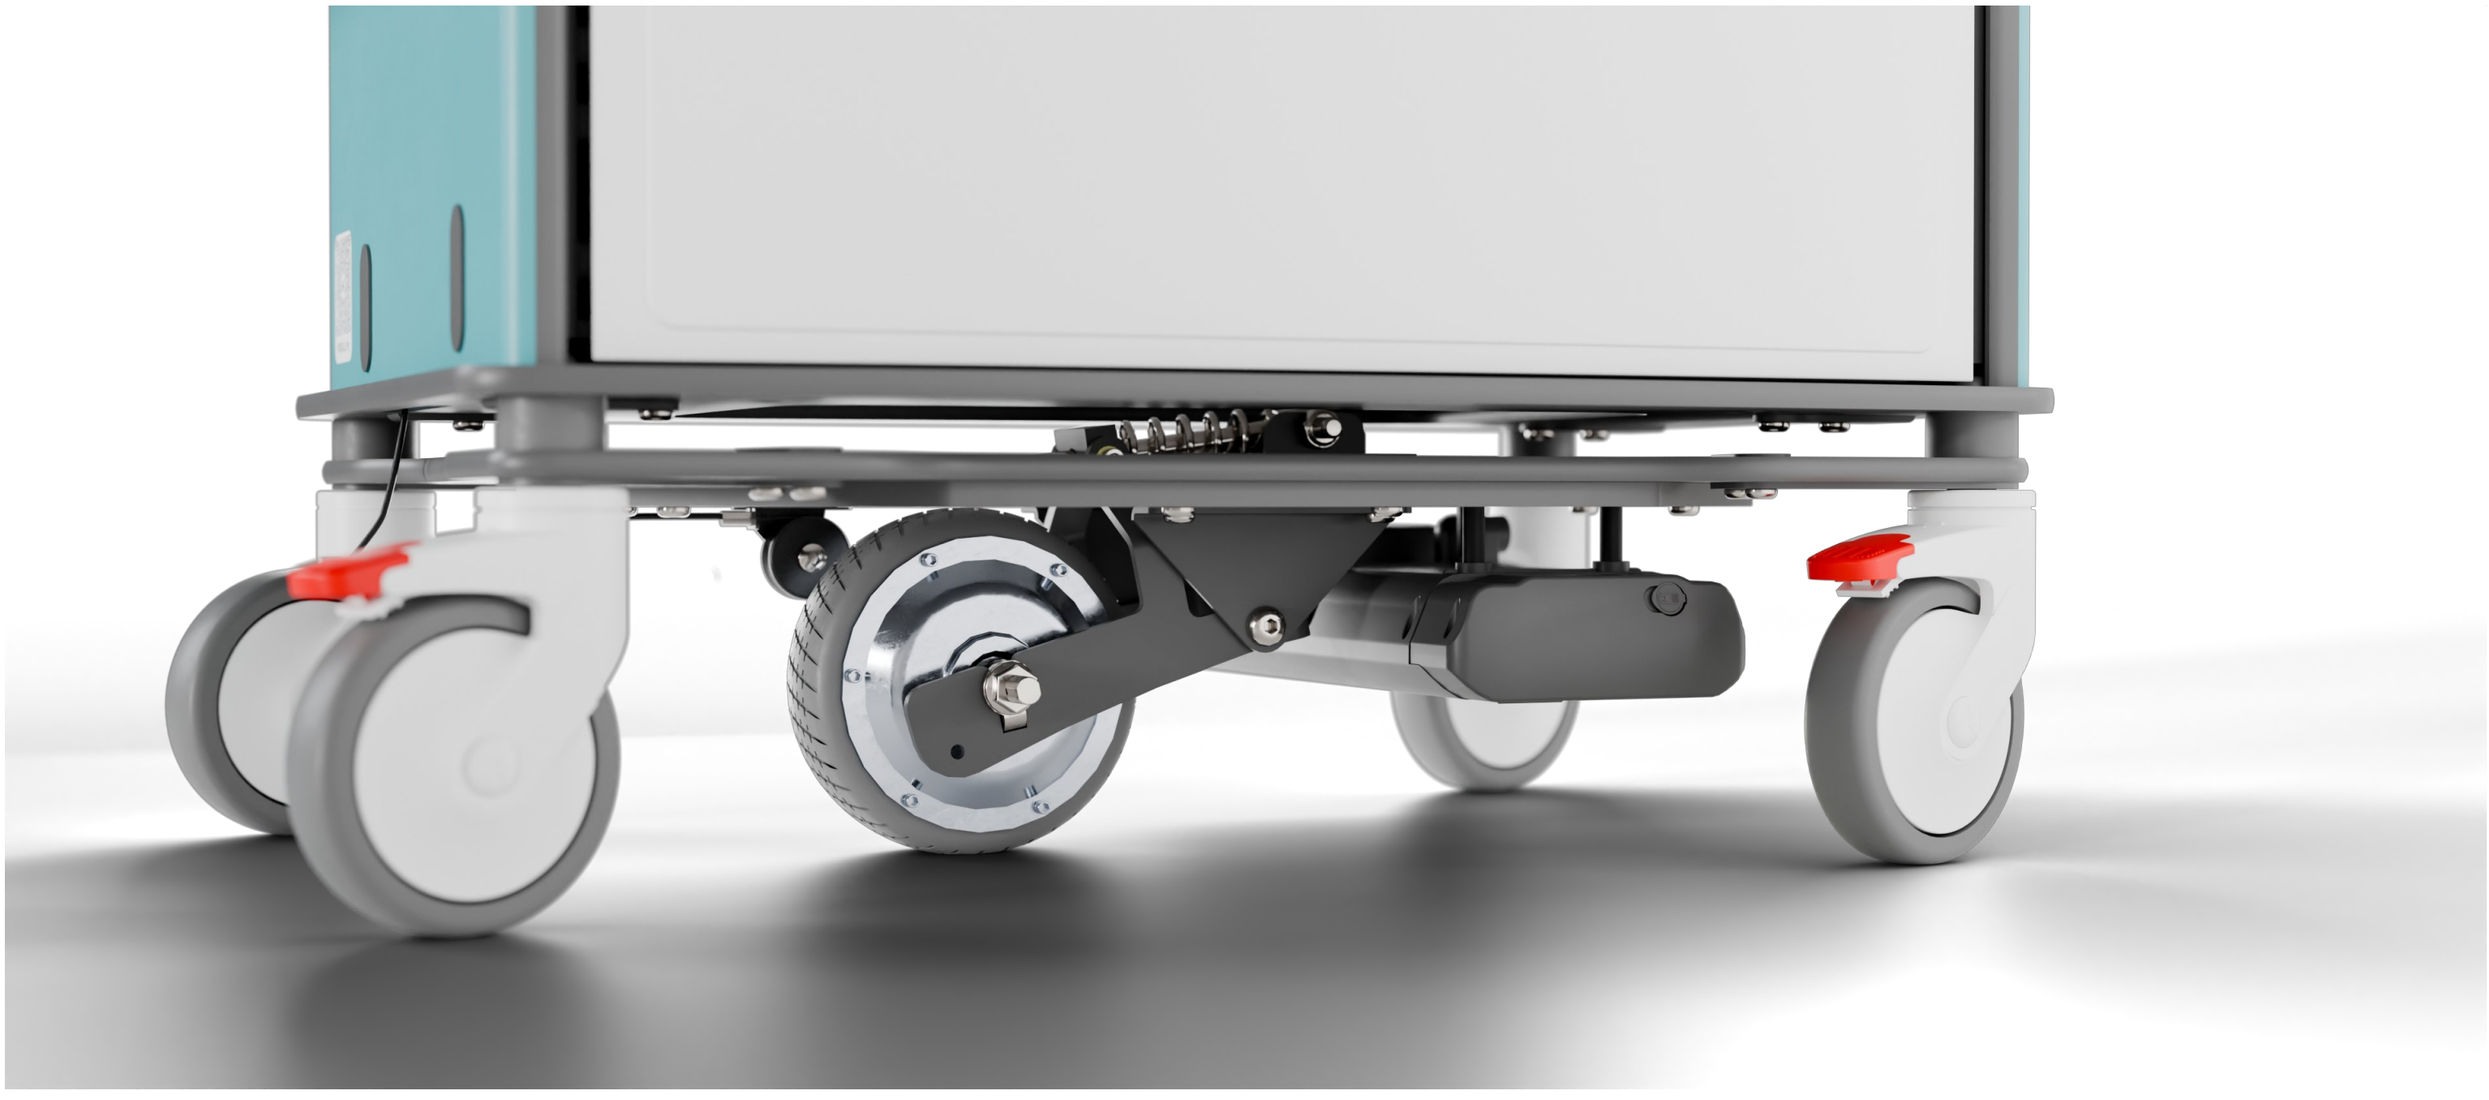

OUR EXCLUSIVES

EasyMov and the motorized fifth wheel

In a hospital environment under constant strain, handling heavy heavy loads and moving stretchers represent daily challenges daily challenges for medical teams. Between saturated wards and and narrow corridors, the risks of Musculoskeletal Disorders (MSD) for staff and discomfort for patients. It was to meet these occupational health and quality of care challenges the assisted transport solution has been developed. Supported Transport

Motorization with 5e Wheels

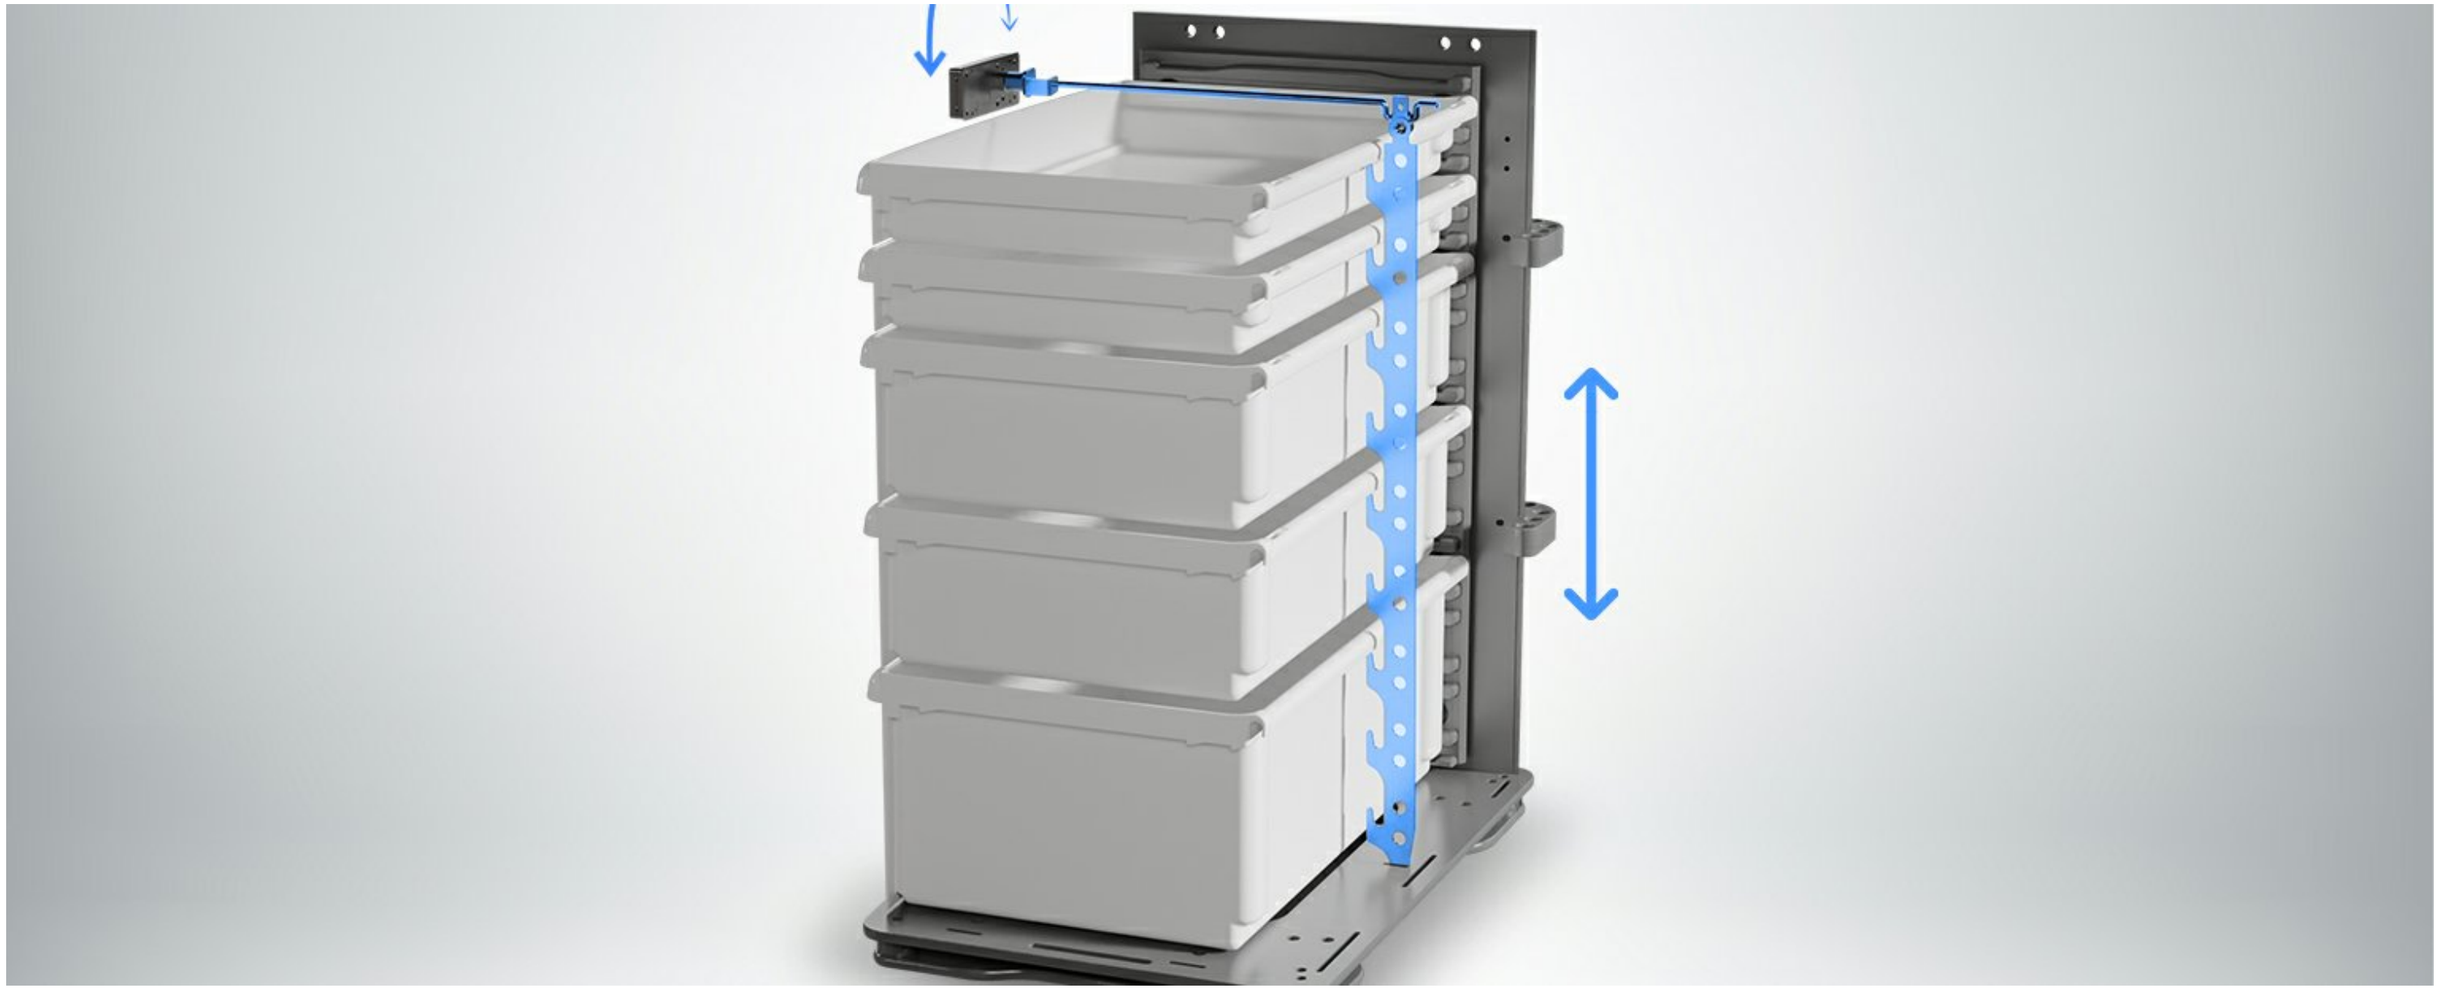

The Motorization, combined with a 5e swivel wheel, offers great maneuverability. It makes it easy to move with its retractable battery, key-secured, its 20 km range, and its front/rear trigger equipped with an electro-brake.

HIGHLIGHTS

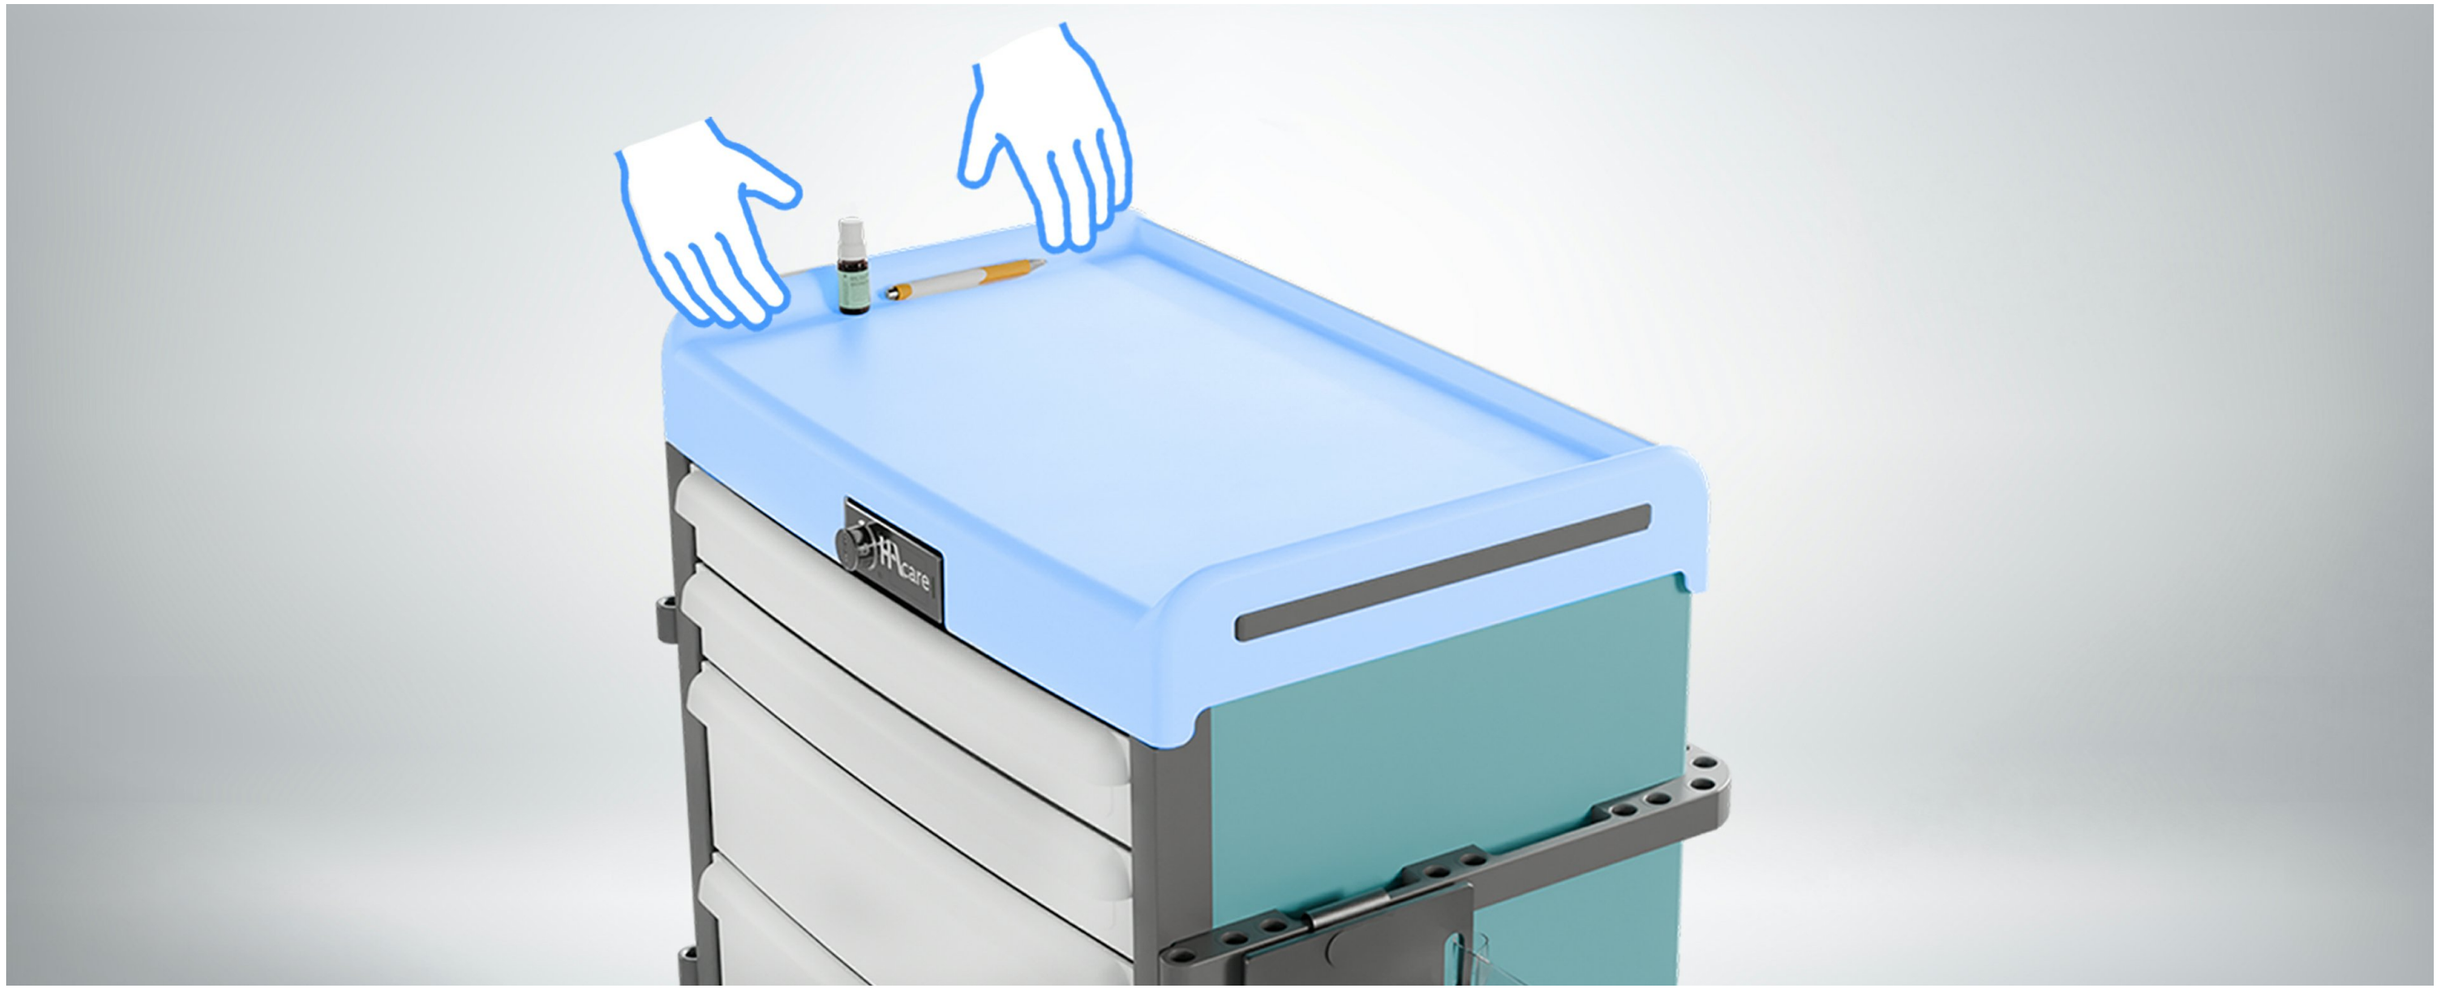

Protect and lock (Joined drawers)

The joined drawers protect the contents of the drawers from indiscreet glances, light and UVs, preserving the quality and confidentiality of stored products. Thanks to the central locking system, opening and closing is done in a single gesture, simplifying staff work while reinforcing security. A practical, reliable solution for combining protection, efficiency and peace of mind on a daily basis.

HIGHLIGHTS

Safety tray for reliable preparation (Work surface)

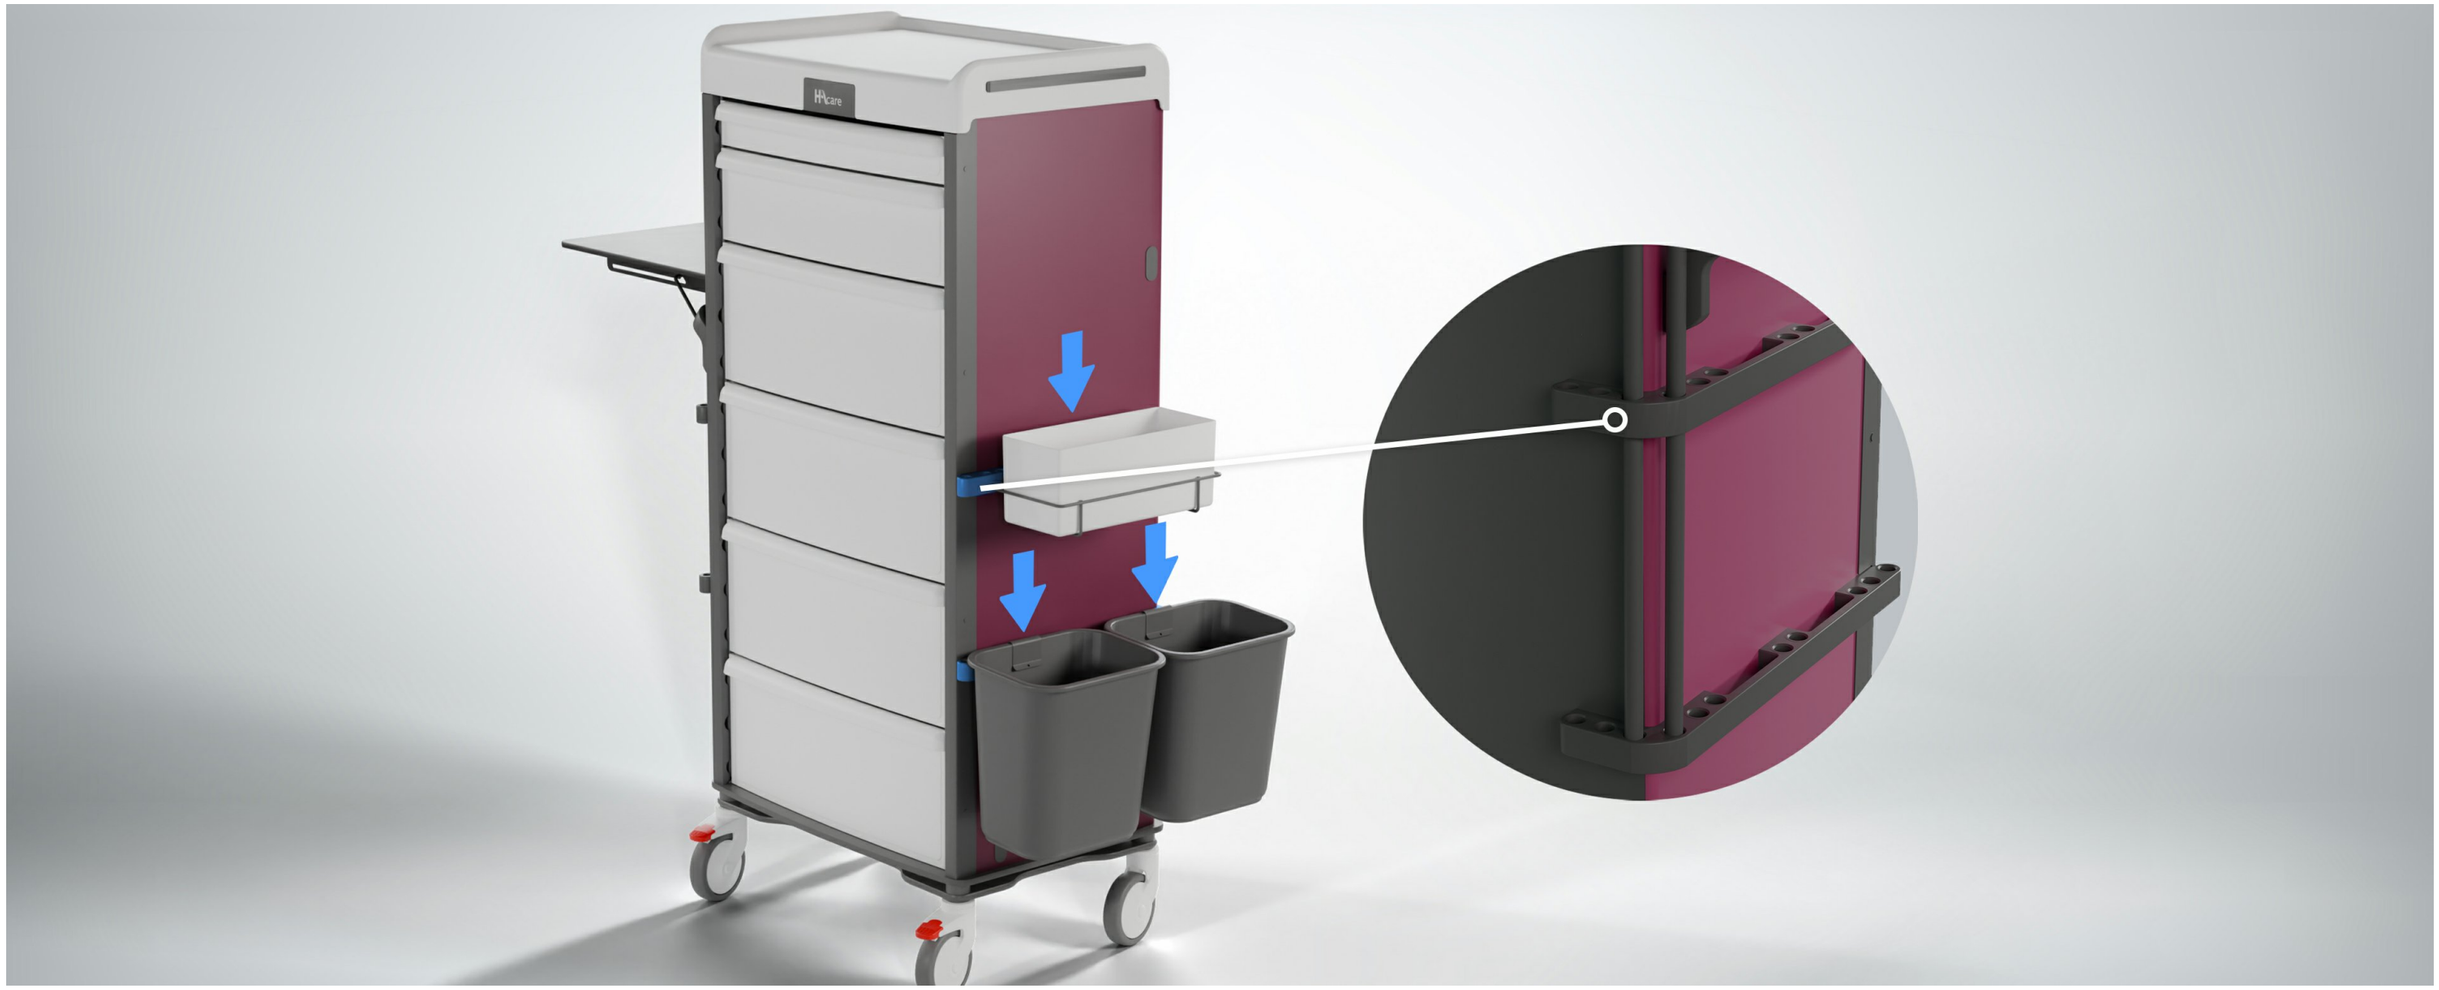

The tray of the medical furniture is designed with a edge on three sides to ensure optimum safety when preparing care. This design prevents falls of instruments or products, even when on the move. Practical and ergonomic, it enables nursing staff to work with confidence, with a stable, safe and easy-to-maintain workspace. A design conceived to combine safety, ease of use and everyday efficiency.

Folding shelf (Optimizing space)

The fold-down shelf offers a convenient extension of the work surface, ideal for optimizing space during diaper changes. Combined with peripheral accessories, they allow securing flasks and material while keeping the main tray clear.

Accessory rail (Easy Clip)

EASY CLIP

Choose your accessories according to your department's uses and needs. Our Easy Clip concept allows easy installation and easy reorganization on rail, without any tools. Gain efficiency and flexibility.

Easy cleaning (Easy CLEAN)

EASY CLEAN

Thanks to the EasyClean® solution, cleaning medical furniture becomes simple, fast and effective. The removable tray without tools, gives total access to the surfaces to be cleaned, which are also removable.Result: full washing in minimum time, impeccable hygiene, and real time saving for nursing staff.

CHARACTERISTICS

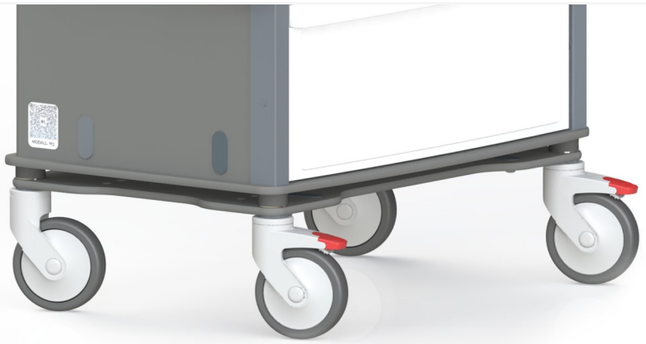

CHARACTERISTICS

Mobility

EasyMOV

Designed to combine comfort of use and performance, our medical furniture offers optimum maneuverability thanks to its integrated shock absorber system. This technology absorbs vibrations and floor irregularities, guaranteeing smooth, secure and effortless movement, even in demanding hospital environments. The Push Assist Handle makes it easier to grip.Every movement is facilitated, reducing fatigue and preserving users' health on a daily basis. Thought to limit musculoskeletal disorders(MSDs), it enables caregivers to work in better ergonomic conditions, while ensuring the safety and stability of the equipment transported.

Choice of castors

Medical furniture adapts to every environment thanks to the choice of 75 mm or 125 mm castors, allowing optimization between adjustment of the work surface height and moving comfort. The two front brakes, easily accessible by foot, ensure perfect stability during care or preparation, reinforcing the security of the furniture and caregivers' confidence in their movements.

Push handles

Designed to combine comfort of use and performance, our medical furniture offers optimum maneuverability and good grip thanks to its push-assist Handles.Its integrated shock-absorbing system makes moving easier.Each movement is fluid, reducing fatigue and preserving users' health on a daily basis. Thought to limit musculoskeletal disorders(MSDs), it enables caregivers to work in better ergonomic conditions, while ensuring the safety and stability of the equipment transported.

Safety

Digital code lock

The digicode lock offers optimum security and simplified management of access to medical furniture. Unlike keys, The code guarantees reliable and rapid locking, limiting the risk of loss or duplication.It enables precise control of access to medicines and medical devices, while improving traceability and confidentiality. Ideal for demanding hospital environments, it combines practicality, safety and compliance with care protocols.

RFID lock

The RFID lock ensures optimum security and controlled access to medical furniture. Thanks to a badge or name card, each opening is simple, quick and traceable. It reinforces confidentiality, limits unauthorized access and is perfectly suited to demanding hospital environments, where fluidity and reliability of movement are essential. A modern, secure and ergonomic system, for simplified management and optimal control of medical equipment.

Key lock

The key lock on medical furniture ensures reliable and accessible security for the storage of sensitive drugs and equipment. Easy to use, it limits unauthorized access while offering a robust and proven solution. Ideal for demanding hospital environments, it ensures content protection, enhances confidentiality and contributes to security protocol compliance. A practical, effective solution for securing equipment on a daily basis and facilitating the work of care teams.

CHARACTERISTICS

Configurable

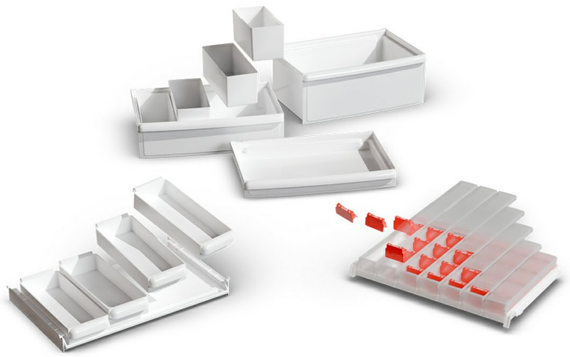

Optimizing space

HACARE medical furniture adapts to every use, thanks to a wide choiceof modular components. In the P80 version, it optimizes care and offers large capacity for storage. Compatible with drawers and standardized trays, allows clear and efficient organization. Ideal for combiningjoined drawers and standard shelves, it ensures a practical, scalable and high-performance workspace on a daily basis, meeting the needs of care teams.

Modularity according to use

Medical furniture offers great modularity for optimized storage: the small drawers for small DMS (syringes, needles ..), the intermediate drawers for compresses and infusers, and the large Drawer for massive solutions. The sliding shelf rather dedicated to administrative acts increases the work surface and frees up space dedicated to preparation. A space dedicated to computer supports optimizes and facilitates patient follow-up.

Choosing components for custom-made medical furniture

Configure your medical furniture according to your needs thanks to a wide choice of modular components. Create a tailor-made solution, perfectly adapted to your daily uses. Each element is designed to optimize your organization, your work comfort and the efficiency of your care, while guaranteeing optimal ergonomics. Complete customization for a upgradeable furniture durable and perfectly matched to your department's requirements.

CHARACTERISTICS

Configurable

Select "type" configurations

Thanks to our expertise in medical furniture, we design for you "type"configurations thought out for each use. Rigorous selection of components and'accessories, optimized layout, ergonomics and comfort of use: everything is studied to meet the specific needs of each department. Our team will work with you to define the configuration best suited to your practices, combining functionality, durability and day-to-day efficiency.

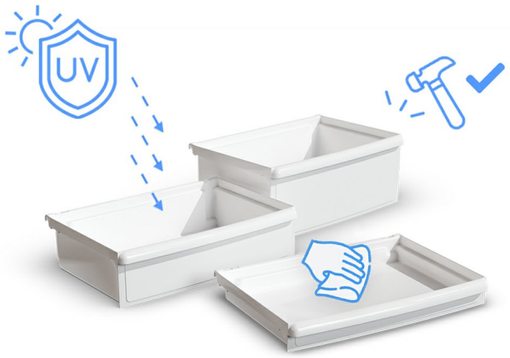

Choosing colors for medical furniture

Customize your hospital environment by choosing from a wide range of colors. Ideal for differentiating spaces by department or use and easier orientation for nursing staff and patients.

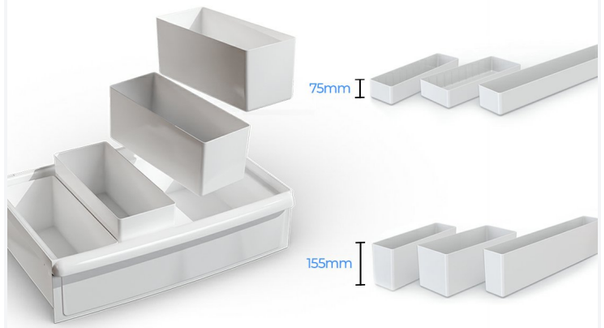

Medical furniture can be adapted to every care organization thanks to its customizable configurations. Choose from 3 drawer heights and compose freely the interior layout to suit your needs.

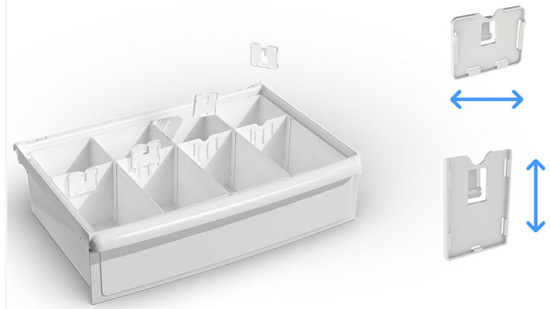

Joined drawers

The joined drawers protect the contents of the drawers from prying eyes, light and UVs, preserving the quality and confidentiality of the products stored. Thanks to the central locking system, opening and closing is a one-touch operation, simplifying staff work while enhancing security.The removable drawers can be autoclave-cleaned, the radiated angles make cleaning easier.A practical, reliable solution for combining protection, efficiency and peace of mind on a daily basis.

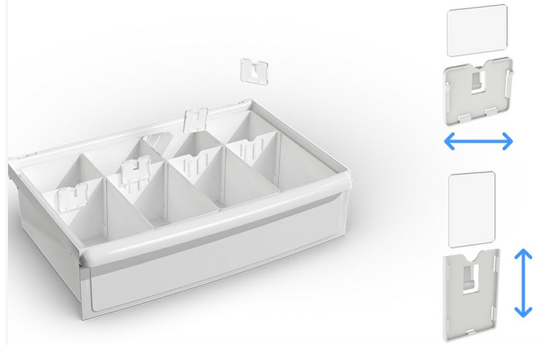

Separation bins

Medical furniture adapts to every care organization thanks to its customizable configurations. Choose from 3 drawer heights and freely compose the interior layout to suit your needs with the separator bins. A flexible and evolutive design that allows you to optimize space, improve ergonomics and make every care station more functional on a daily basis.

Separators

Freely compose the interior layout to suit your needs with divider bins and separators, separator combs, subdivision boxes that isolate each care element for greater safety. A flexible and evolutive design that allows optimizing space, improving ergonomics and making each care station more functional on a daily basis.

Label holders and labels

Label holders on medical furniture drawers facilitate rapid and acurate identification of contents, reducing errors and optimizing care organization. They enable clear identification of drugs, medical devices or supplies, improving productivity and workflow for teams. Adaptable and modular, they contribute to a structured and secure care environment, while simplifying the day-to-day management of materials and reinforcing the efficiency and safety of interventions.

Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training

The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
